Tri-State College
Angola, Indiana

DEDIC

To Professor Luther A. Ott, former Dean of the Department of Aeronautical Engineering of Tri-State College, this book is respectfully dedicated.

The only things of real value in this life are unselfish service and friendship. Professor Ott was the personification of both. Always ready to help the student with his school work or individual problems; never quick to misjudge; always willing to give advice and counsel wherever needed, he endeared himself to all who had the opportunity of knowing him and working with him.

Though he has gone to his reward his spirit lives on and shall continue to live as a guiding hand to all young men who came in contact with him. Truly, no finer tribute can be paid a man than to have people say of him, "He was a good man."

PROF. LUTHER A. OTT
E. E., M. S. E.

ATION

Professor Luther A. Ott became Dean of the Department of Aeronautical Engineering in 1930. During the year prior to that he attended the University of Michigan from which he received the degree as Master of Science in Aeronautical Engineering. Under his expert guidance the department developed until at the present time it is the largest and most popular course offered by Tri-State College.

His ability won for him numerous honors. He was a member of the Society of Automotive Engineers; of the American Society of Mechanical Engineers; of the Civil Aeronautics Committee of the National Aeronautical Association; of the State Aeronautical Committee of the American Legion and Chairman of the Aeronautical Section of the Indiana Industrial Education Association. He was active in developing aeronautical interest in the College, of the state and of the country, being frequently called upon to speak before airminded groups. In him Aviation had a staunch and true supporter.

● ● ●

Through airy roads he winged his instant flight
To purer regions of celestial light.

FOREWORD

● ● ●

Youth's storehouse of treasured memories is soon forgotten in the forward march of life, and being men of progress we must go on with faces ever turned forward; but, if in years to come, this 1935 Modulus succeeds in taking you back to the campus, and in bringing before you friends almost forgotten, it will have served the purpose for which we have so earnestly striven.

But to the olden dreams that time endears,
And to the loved books that younger grow with years . . .
—LOWELL.

From my youth upwards
My spirit walk'd not with the souls of men . . .
—POE.

In the long way that I must tread alone,
Will lead my steps aright.
—BRYANT.

The groves were God's first temples. Ere man learned
To hew the shaft and lay the architrave.
—BRYANT.

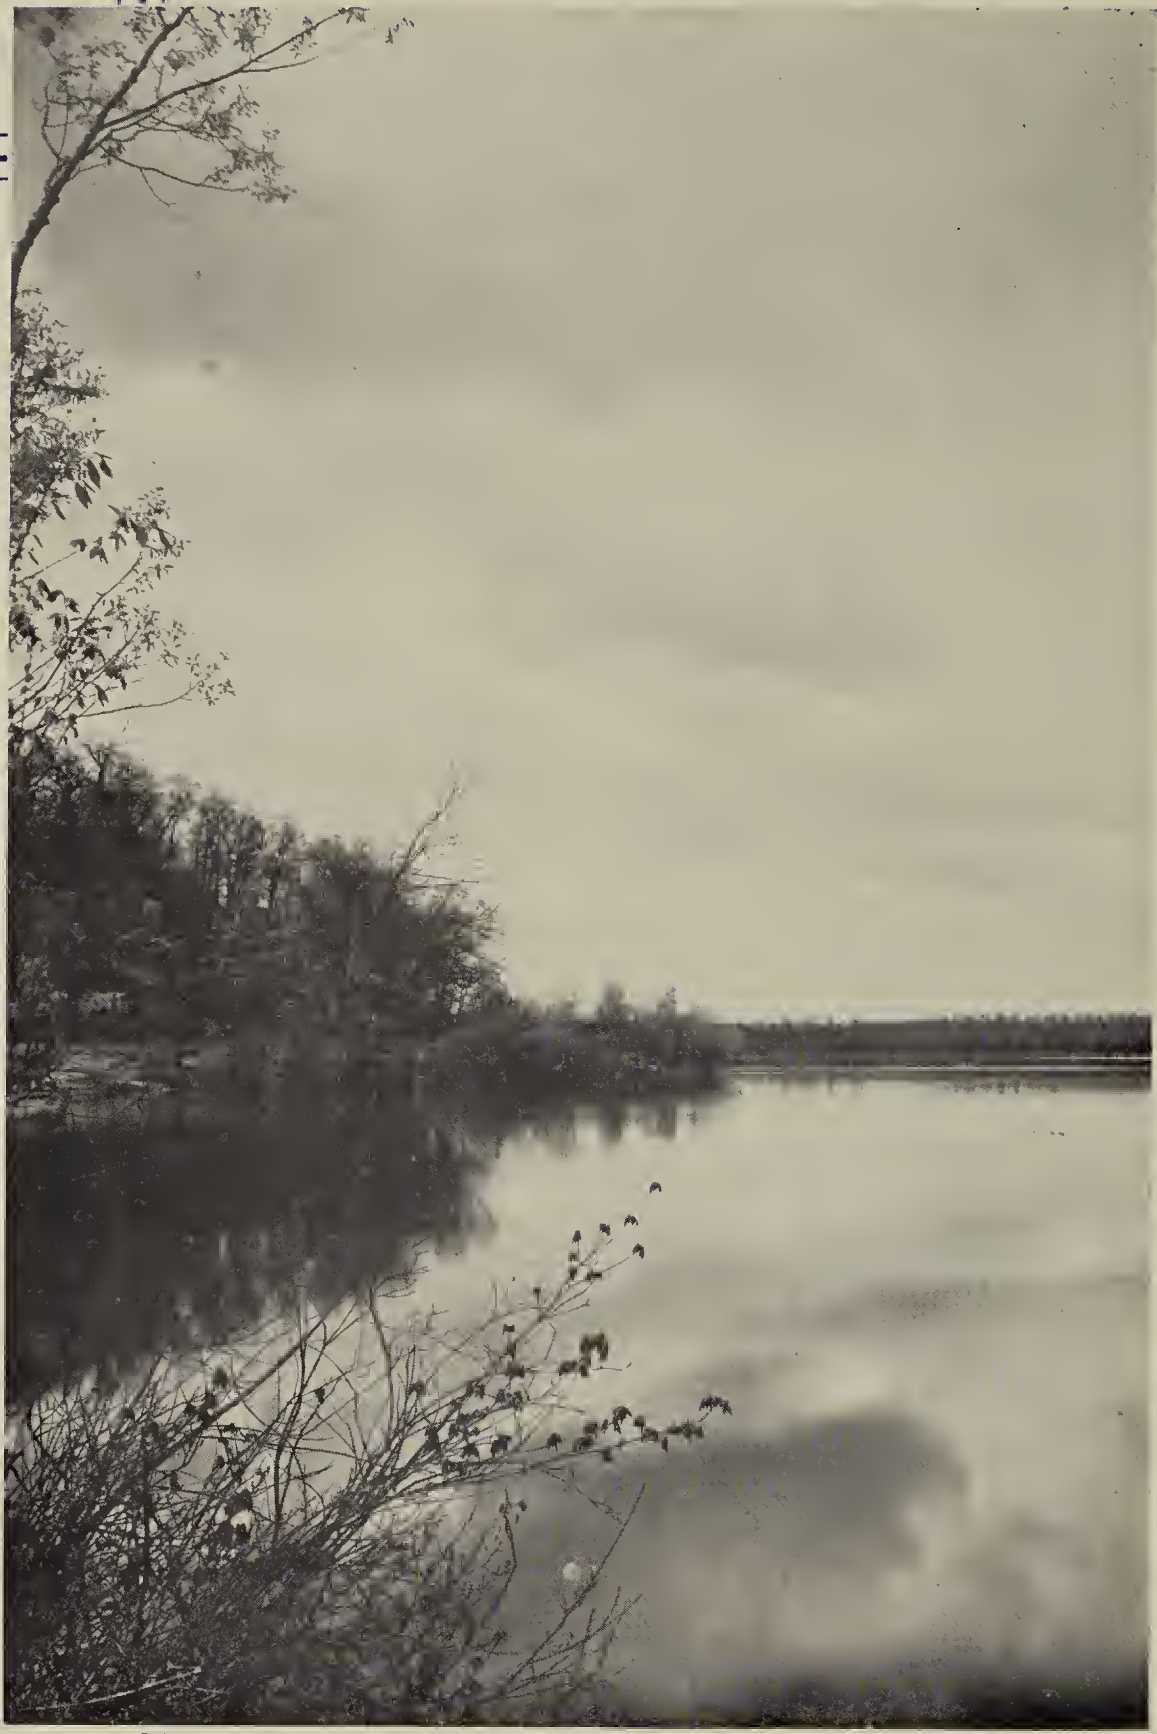
Sail on, nor fear to breast the sea!
Our hearts, our hopes, are all with thee!
—LONGFELLOW.

* * *

When duty whispers low, Thou must,
Then youth replies, I can . . .
—EMERSON.

Here where these sunny waters break,
All burdens from my heart, I shake.
—WHITTIER.

I speak for all-shaped blooms and leaves,
Lichens on stones and moss on eaves . . .
—LANIER.



All placid lakes and waveless deeps,
Vale-calms and tranquil lotus-sleeps . . .
—LANIER.

The Open Door of Opportunity

During the more than fifty years of its history, Tri-State College has always stood for the expression of some very definite ideals. Foremost among these, has been the determination to make it possible for any young man or young woman to take advantage of the resources which the school offers, regardless of the extent of his or her previous training. The school has clung tenaciously to this ideal and has thus been instrumental in making it possible for thousands of young people to secure a start in life when otherwise they would not have had a chance.

Many changes have taken place in the years which have intervened since the founding of the school; changes both in personnel and in types of training offered. However, in spite of all such changes this purpose has remained constant.

A great many men and women have labored through the past years to help bring about the accomplishment of this purpose, and we of the present day wish to pay tribute to the unselfish service and the unswerving loyalty of all these men and women in the accomplishment of that which has been achieved. They gave unselfishly of their talent and labor. We in turn pledge ourselves anew to the accomplishment of the purposes and aims of the school to the end that it may serve young men and women as well in the future as it has in the past.

Getting Along in the World

After graduation every student should be interested in what he is going to do and as to how he is to succeed. Many folks will tell him times are difficult and that there is not much chance for advancement at the present time. However if the graduate will apply himself, study conditions, develop his personality, he will discover there are many things to do and many positions to be filled. In fact it takes conditions just as they now exist to bring out the best a person has to offer and many folks are right now benefiting by what might be called emergency conditions. The next question to come up would probably be "What is the rule or procedure to follow in order to get along in the world?" There is no exact rule but there are many things to do that can not but help out a lot. One of the rules is to get down to real honest work again. The world is always looking for a number of young folks who are willing to really get down to work. Study individuals who already have good positions and try to determine just why they continue to hold down their positions. Always be ready to pick up methods which have helped others to get along in the world and remember about ninety-eight per cent of what many folks style as luck is simply an application of common everyday work.

W. A. Pfeifer
Vice-President
Head of Electrical Department

The Public Always Wins

Under existing conditions it is quite easy for one to believe that the reward for one's labor falls to others. In other words, the laboring class of our population becomes poorer while the wealthy becomes wealthier. It may be well for us to study this situation since it affects everyone who is preparing himself to enter any branch of industry. Possibly it is better to realize that the public always wins. All of our efforts are cumulative to the public welfare. As proof of this statement it is only necessary to briefly consider a few of our typical industrial endeavors.

For instance, consider the automobile industry which at the present time is quite busy. Although we know there are over ten million unemployed individuals at this time, that basic materials such as iron, copper, and lead are at very low prices, and that there is labor unrest due in many cases to low wages, the profits of auto manufacturers are low and, in many cases, at the vanishing point. However, the public which represents the consumer buys more value—even with a theoretical fifty-nine cent dollar—than ever before.

Again, consider taxation. Some say that our government is dominated by rich men. Everyone says, "Soak the rich with tax charges." Nevertheless, our present Congress voted with a big majority to spend almost five billions of dollars so that no person need go without the necessities of life.

It must be true that the public always wins.

• • •

Resourcefulness

Resourcefulness is the quality that enables its possessor to make the most of his opportunities, to do the right thing in emergencies, and to avert disaster by good judgment and presence of mind.

In Engineering and Business it is the resourceful man who will always be found in the lead. He takes advantage of an opportunity before those around him know of its existence.

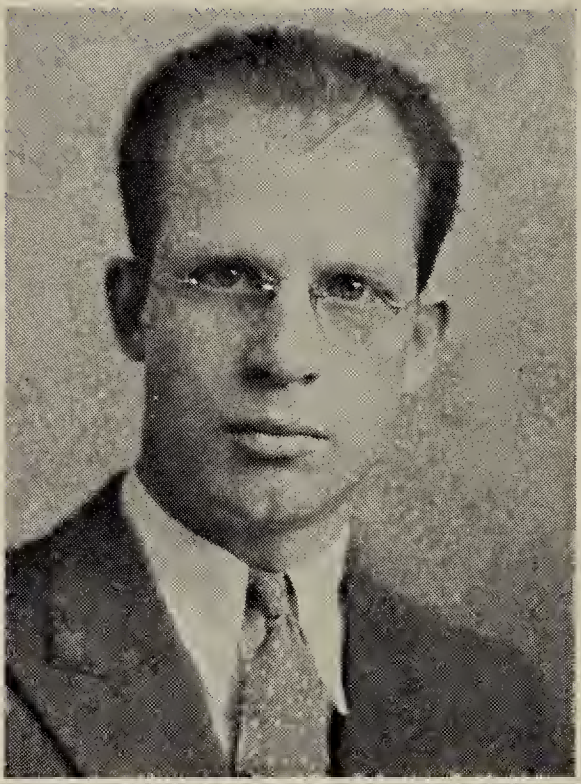
It is the close observation of little things which is the secret of success in Engineering, Business, and every pursuit of life. Human knowledge is but an accumulation of small facts made by successive generations of men, the little bits of knowledge and experience treasured up and placed in new combinations by the resourceful. Though many of these facts and observations seemed, in the first instance, to have but little significance, they are all found to have their uses and fit in their proper places. In the case of the conic sections discovered by Appolonius, twenty centuries elapsed before they were made the basis of astronomy. And had not mathematicians toiled for so long, and apparently so fruitlessly, over the abstract relation of lines and surfaces, it is probable that but few of our mechanical inventions would have been in use today.

To the resourceful, nothing is insignificant; even accidents and failure are but stepping-stones and guide-posts to greater achievements and success. The greatest misfortune that can befall a young man is to lean on others for support while his character is forming. The oak that stands alone to contend with the blast of the storm only takes deeper root and stands the firmer for succeeding conflicts. So it is with men. Those who are trained to resourcefulness are ready to go out and contend with the sternest conflicts of life. The storms of adversity are sure to come.

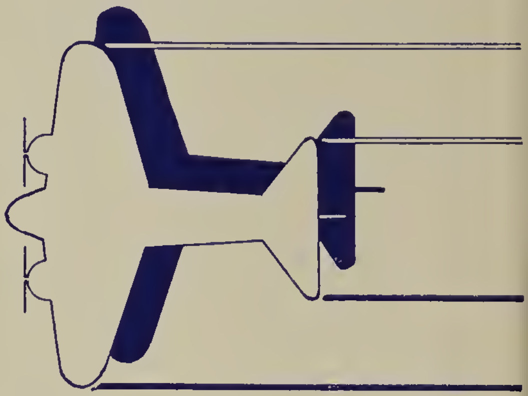
Resourcefulness is never found in the company of idleness, but thrives upon necessity and hard work.

G. G. Niehous
Head of Civil Department

Prof. S. D. Summers, B. S. in E. E.
Head of Physics Department



Prof. W. E. Burnham, B. S. in A. E.
Head of Aeronautical Department



The successful man is not necessarily the one who attains fame or fortune, but the man who accepts the responsibility that is rightfully his.—Professor Summers.

Engineering is a profession of service. The public is placing its trust in you and the greatest happiness and success will come to the man who gives the greatest degree of honest service.—Professor Burnham.

Man is more than a tool. He has a personality that is capable of appreciation and enjoyment of the best in life. He should extend his horizon into other fields in order that he may not lose sight of the best that is in him.—Professor Parrott.

Prof. Gerald H. Moore, B. S. in Ch. E.
Head of Chemical Department

Have you your next goal in view? Be not contented, although you may be satisfied. Reach out and keep a lofty outlook on life—set your next goal even higher than the first.—Professor Moore.

Prof. Alice A. Parrott, A.B., B.Pd., A.M.
Head of English Department

Prof. John Humphries, B. S. in M. E.
Mathematics, Mechanics

Prof. Milford E. Collins, B. S. in E. E.
Mathematics, Mechanics

Our individual responsibilities towards other individuals and society, also, our responsibilities as groups towards other groups, as well as towards other individuals, knit the whole human race into one large family. —Professor Humphries.

Man is educated in two ways: First, in the school of experience which all men attend, and second, in the institution of learning which few attend. The individual who has obtained an education in an institute of learning is capable of making a broader use of his education obtained in the school of experience.—Professor Collins.

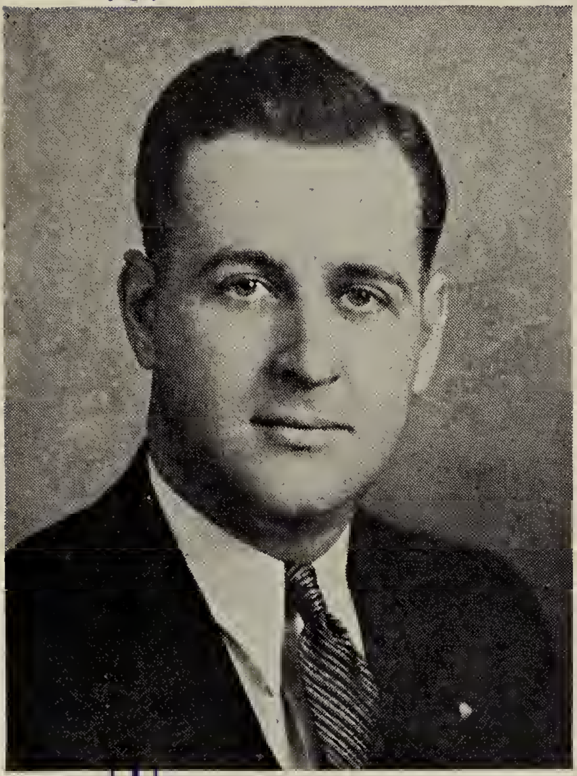
Prof. Verne Jones, A. B., A. M.
Mathematics and Mechanics

Prof. William C. Overton, B. S. in M. E., M. E.
Drafting

The extent of a man's education may be measured in terms of attitudes. Although his training may be highly specialized, or of such a nature as to include factual information on a variety of subjects, his education is not complete until he has acquired discernment, open-mindedness, and moral courage. —Professor Overton.

The object of education in recent years is efficiency, which means power to accomplish. It presupposes a good degree of intelligence, but it goes beyond that. Knowledge without the ability to apply or use it leaves one theoretical, which is a term of reproach.—Professor Jones.

Prof. Lawrence D. Ely, B.S. in A. E.
Aeronautical



Grateful should be the man who is sufficiently fortunate to select as his career a science so fascinating as to provide for him both the necessities of life and the joy of living.—Professor Hauber.

Prof. Cecil Hauber, B. S. in C. E.
Mechanics, Civil Engineering

An Engineer's life must be built on a firm foundation of sound principles and engineering fundamentals in order for his life to reach skyscraper proportions. You are the chief engineer on this job. Have you laid the foundation for a skyscraper or a shack?—Professor Ely.

There is one law of conduct that those who would live steadfastly can not afford to disregard. It is the principle of consideration for fellow-men. If this principle is practiced consistently, life's genuine rewards will be increased tenfold.—Professor Mary E. Disher.

Prof. Mary E. Disher, A. B.
English

Prof. E. S. Lower, B. S. in Ch. E.
Chemistry

To succeed professionally, you should first win the good will of your neighors, the esteem of your fellow citizens, and success will come to you because you rightly deserve it. —Professor E. S. Lower.

Prof. W. R. Robertson, A.B., LL.B., C.P.A.
Accounting

Prof. Cushman Hoke, A. B., A. M.
Economics

The educated man will reserve his final judgment until he is sure that in one program lies a greater opportunity for happiness, for prosperity, because in that same program there is greater happiness and greater prosperity for his fellow men.—Professor Hoke

We should not expect overnight nostrums to produce any great or permanent revolutions. But, with an abiding faith in a better world ever growing better we should strive to understand and co-operate with the whole composite character of the age in which we live.—Professor Robertson.

Through the desires and achievements of the successive American generations from lands of circumscribed, iron-bound social and economical customs there has crystallized the spirit of America.—Professor Crisman.

Prof. J. G. Crisman
Secretarial Department

Prof. Roy Reppard, B. S. in B. A.
Field Representative

If a man has the faith to see a vision of what he wants to be and to do, and a faith to believe in his vision, then he needs courage to start, courage to meet the disappointments and criticisms that fall upon him, and courage to keep his faith sure and strong.—Professor Reppard.

CLASSES

• • •

The graduating students of the Spring, Summer and Fall terms met in the College Auditorium, April 15th, for the purpose of organizing the Senior Class and electing the Senior class officers and class advisor for the year 1935.

With practically the complete graduating class of 140 members present, the body elected the following class officers: For President of the Senior Class, Grant Moloney; Vice-President, Charles Machin; Secretary, Fraser Miles; and Treasurer, Francis McLaughlin. Professor Overton was the unanimous choice for Class Advisor.

In the meetings following the election of officers and the class advisor, committees have been appointed to look after the various phases of class activity in both business and pleasure. Arrangements have gone through for the securing of caps and gowns for the graduates, for the baccalaureate speaker, and for services in one of the local churches on the Sunday preceding Commencement Week. Prof. O. C. Ott, of the National School for Teachers, Nashville, Tenn., is to be this year's commencement speaker.

Commencement Week activities will begin with church services in the Christian Church on Sunday, June 9th. Then on Monday night the Dramatic Club will give a play for the Senior Class and relatives or friends. Tuesday will be left open for any fraternity or private parties that may be given on the campus. On Wednesday evening the college will give the Senior Class a banquet at the Potawatomi Inn, which will be followed by a dance sponsored by the class members.

There are plans going forward for a full day of sports for the whole class. Beginning perhaps with a baseball game in the morning, and followed in the afternoon with races, tugs of war and climaxed with an auto race or airplane stunts is the present outline for the day.

The class flower has been selected as the American Beauty Rose, with the harmonizing colors of Crimson and White for the class colors. This color scheme, Crimson and White, is followed throughout in decorations, favors, and in dance programs. The choral music for all Commencement Week services will be supplied by the College Glee Club under the direction of Prof. Harshman.

An innovation instigated by the present graduating class with the hope that it will be continued as a custom of Tri-State College is the selection this year of an iron ring for the class token. This iron ring, fitting on the little finger of the right hand, is symbolic of engineering. The custom for graduates of engineering schools to wear the ring after graduation is followed by other engineering schools and it is the hope of the present graduating class that it will also become the custom for graduate engineering students from Tri-State College to wear this ring as the symbol of their college and their profession.

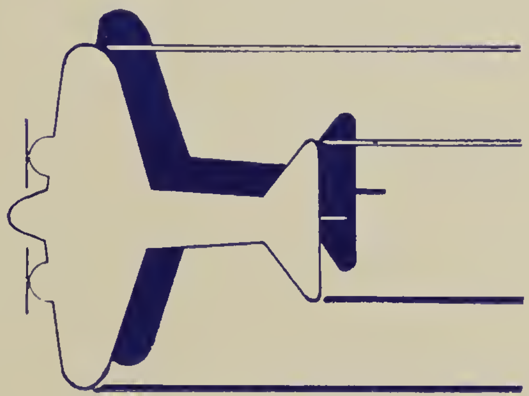
WILLIAM LaBARRE

IN MEMORIAM

William LaBarre, born November 30, 1916, died June 18, 1934, at the age of 17. His home was in East View,, New York. He attended Morristown High School, New Jersey, graduating on June 24, 1932. William was a member of the Chi Epsilon fraternity, and was a brother good and true. Nobly living, he died in his youth when life was sweetest. In our hearts we carry the tenderest memories of a fellow student who has left our midst.

UNDER GRADS



Studious? Well you'd be surprised!
Jack and Bill off for class
"Jim"
Where is yo' all goin', Arnold?

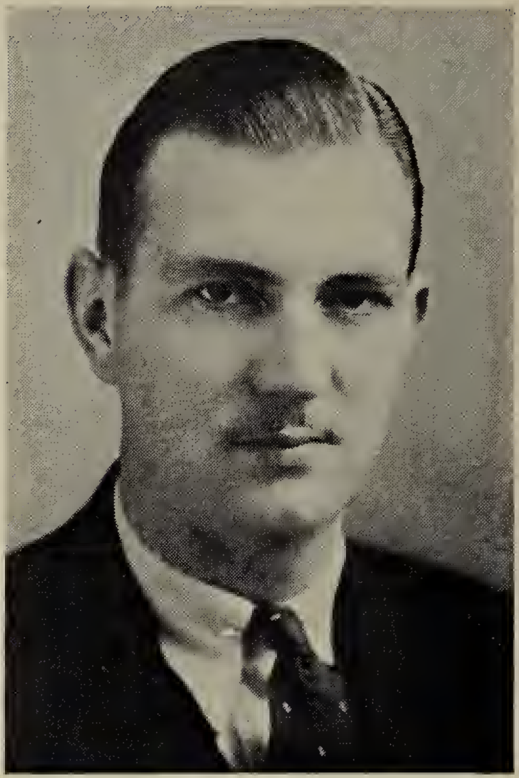
CAMPUS LIFE

PUBLICATIONS

Lee M. C. Taylor
Editor

The Staff



Charles Hinaman
Co-Editor

The staff of the Modulus for 1935 wishes to thank everybody who in any way has helped to make this year's Modulus possible.

We would be ungrateful if we did not specifically mention the co-operation extended to us by the following:

The Board of Directors of the College, the faculty, and our advisors of the student body for the loyal manner in which they have backed the subscription campaign we are particularly grateful.

To our friends who are advertisers in this year's Modulus we extend our sincere thanks. Without their aid the book would hardly have been possible, and we urge the student patronage of these advertisers.

With their acknowledgement, the staff takes real pleasure in presenting this year's Modulus. To produce this book has meant work, but it has been enjoyable work for a splendid spirit of harmony has existed and each staff member has assumed and carried his responsibility in a fine manner.

Our only hope is that the reading of this book will be as enjoyable and pleasant to you as the preparation of it has been to us.

AN APPRECIATION

Alice Parrott
Literary Advisor

We would be very unappreciative and discourteous if we did not, at this point, acknowledge the valuable assistance which has been given to the editorial staff by Miss Parrott, in her role as literary advisor for this year's Modulus.

Although Miss Parrott is one of the busiest of the faculty members, she was never too busy to help us at any time we went to her.

For the patience with which you heard us, for the wisdom and accuracy of your counsel and advice, we want you to know, Miss Parrott, that we are truly grateful.

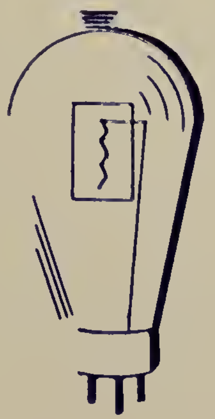
COUNCIL

In an effort to bring the fraternities at Tri-State College closer together a group of men from each of the six national fraternities on the campus met with Professor Handy late in February, last, to discuss the possibilities of an Interfraternity Council. A group of plans was drawn up and sent before the Tri-State College Board of Directors whose approval was granted.

Already a most ambitious program has been started, and capable officers to serve during the Spring semester were elected at the final meeting of the Winter term.

Since the men who compose the Panhellenic Council represent their respective chapters as a whole, credit for the achievements of this group must go to the entire fraternal group. But much credit is due those men who with untiring efforts promoted and aided in the formation of this council. The fact that leadership, scholarship and character should determine the personnel and permeate the entire fraternal situation was probably foremost in the minds of these men. This organization, not alone, but with the houses which they represent, is aiming to promote on the campus a true atmosphere for moral, athletic, scholastic and social development. To be able to give an all-round social program to the desiring Tri-State student is one of the main purposes. Another aim of the council is to promote inter-fraternity athletics in a systematized manner. There is a dual purpose is this: First, to encourage athletics; and second, to offer sports for the athletically inclined students. These, we feel, can be rendered without interfering scholastically.

The few weeks that the council has been functioning have been very successful. As in all new projects, many unforseen obstacles have arisen, but the spirit of the group has never been daunted. The manner in which the council was received by the school authorities as well as the student body in general was most gratifying to all concerned. This is due not only to the splendid co-operation of the fraternities, but also to the fine personnel of the council and their steadfast loyalty to Tri-State ideals.



Why Belong to a Fraternity?

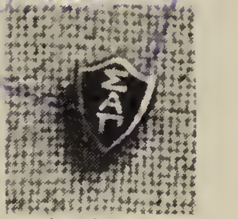
Fraternity life, what is it? Many parents ask that question today. They wonder whether their son should join a fraternity. Will it do him harm or will it do him good.

Many parents are misguided on fraternity life by the great silver screen in our modern theatres. There they see that fraternity life is one grand party after another. They see the homes that are owned or rented by the fraternities but fail to see the actual life that is developed inside the regular fraternity home. It is too bad that many of the parents who are in doubt of what goes on behind the doors of a fraternity cannot live in the fraternity home for awhile. If they did I am sure that they would change their minds and see that their son belonged to an organization of this kind.

The grand parties that they see on the screen are only moving pictures. Behind the doors of that fraternity home many things take place that are responsible for the development of character. During the school term the members must work hard in order to keep up the scholastic standard required by the fraternity. If the members fall below that standard they are expelled from their respective fraternities until such time arises that they have been able to prove they can make that average and keep it. In setting this standard the member of a fraternity must apply himself diligently to his studies. In this he is doing himself the greatest favor that can be done. He is acquiring the application that is necessary for the attainment of the goal toward which he is striving.

Many parents are of the opinion that if their son joins a fraternity he will naturally become a good student. This belief is false. No fraternity in the world can force a man to apply himself to his studies if he does not wish to. All his fellow members can do is bring pressure to bear, and if that is not successful he is expelled. To be expelled from a fraternity is a disgrace that a man of character cannot stand. Rather than bring this disgrace upon himself and his fraternity he will strive hard to maintain the confidence placed in him by his fellow members.

Sigma Alpha Gamma



BETA CHAPTER

Established 1926

Sigma Alpha Gamma originated at Anthony Wayne Institute, Fort Wayne, Ind. The object of this sorority is to form a more perfect spirit of fellowship among town and college girls, establish higher ideals, provide for better social activities, and encourage scholastic standing. Beta Chapter in Angola was installed November 21, 1926, by the girls from Alpha Chapter.

In 1927 a third chapter was formed in the Tulsa Business College, Tulsa, Okla. Shortly after, the installing of Delta Chapter at Bliss College, Columbus, Ohio, made Sigma Alpha Gamma a National Sorority. Epsilon Chapter at Fort Wayne, Zeta Chapter at Salem, Ohio, and Eta Chapter at Richmond, Va., complete the roll.

The local chapter was hostess to the National Convention in 1933.

Sigma Mu Sigma

Alpha Chapter, Sigma Mu Sigma, was founded at Tri-State College on Good Friday, March 25, 1921, by three students of Masonic affiliation who saw the fine possibilities in store for the furtherance of true Masonic Fraternalism. With the aid and combined enthusiasm of nine other Masons, who were also students on the campus, this chapter was duly formed. In 1924 this and other chapters of Sigma Mu Sigma were chartered as a National Fraternity and became a member of the Interfraternity Council.

The business of the world is carried on through human organizations. Any institution that provides opportunities for its members to learn about human nature and to practice the art of getting along with other human beings can justify its existence.

''Membership in and life at a fraternity house is a concentrated experience in human association.''

In that single sentence is the whole sum and substance of fraternities. The college and the fraternity are a laboratory of life. The fraternity takes up a student's education where the classroom leaves off. Many personalities are brought together under one roof. Here are found people from various communities ranging from the open prairie to the large metropolitan city. The fraternity is a miniature melting pot into which these young people are poured in their various stages of immaturity and meagre experience and from which they ultimately go better equipped for having rubbed shoulders with many different human beings, to take their places in the community.

The aim and function of Sigma Mu Sigma on the college campus is to create a well balanced college fraternity. It is based on scholarship and aims to develop the intellectual side, for good scholarship is largely a matter of interest and application. Application requires self discipline. It is, however, a general fraternity and not purely a scholarship fraternity, for to bind together by the ties of friendship is to have each one ambitious to make the group with which he is identified a good organization. This function gives the group a common objective and immediately sets up a high standard of conduct and performance. The intangible thing called ''organization spirit'' is the greatest force in civilization and it is a real phenomenon in a college fraternity.

If we succeed in establishing a higher standard of scholarship for a social fraternity by concentrating on that as one of our three cardinal principles and giving our best efforts to building up that ideal, other fraternities will endeavor to match our efforts and we will have succeeded in our purpose to lift the scholarship standing of social fraternities.

Iota of
Sigma Delta Rho

In 1901 Phi Sigma Chi Fraternity was founded in Zanesville, Ohio. Delta Epsilon Chapter was admitted to Tri-State College in the fall of 1927. There were many people who doubted whether this new fraternity would flourish amongst, what we might call too much competition. The path was neither smooth nor easy; however, the men who founded this fraternity, sacrificed their time and money in order to make it a first-class organization. In the ensuing years our chapter increased not only in numbers but also in prestige, until we were among the leaders on the campus; then the college passed an ultimatum entreating all fraternities to turn collegiate. Up until this time the majority of the fraternities were social. With this new law to obey, our difficulties again arose to defy us. We made several contacts and were finally admitted to our present status of Sigma Delta Rho, on April 21, 1934. We had the same type of competition to overcome as when we started as Phi Sigma Chi. But now as we have just completed our first anniversary, we feel that we are once more on our feet and capable of remaining there.

We look upon our pledgeship as a serious rite. It is not the purpose or aim of our fraternity to pledge a man in order to belittle or ridicule him; but we do want to ascertain as to his actions, character, and general attitude before we accept him as a brother. In order to become a member of this fraternity, hard work is required of a pledge, but then, to appreciate any of the real things of life, hard work is necessary. The men who are accepted in this organization must be of the highest caliber—men who will give their best in order that the traditions of the fraternity shall be upheld.

Harmony is a vital essential in any form of business or social enterprise. It is our aim to promote harmony among the members and to instill in each, the spirit of the Golden Rule. Friendship, Comradeship, and Brotherhood are the mainstays of this fraternity. Along with these three standards set up by our fraternity, we find the words courage and perseverance. If a man has the friendship and comradeship of his fellowmen; then he is well on the road towards having the courage to fight life's battles. However, with this courage must also go perseverance to continue, despite difficulties and hidden barriers, towards the goal which he has set up for himself and had the courage to strive to attain. With the three standards used by the fraternity, and the two corollaries to them, we feel that our men are able to do the difficult tasks in life cheerfully, and successfully.

We congratulate our graduating brothers and wish them every success in their undertakings, and may they always remember the friendship afforded them by their membership in Sigma Delta Rho.

Beta Phi Theta

In November, 1917, Beta Phi Theta Fraternity was founded at the Milwaukee State Normal School by a group of young army officers. It was the first social fraternity on the campus and for five years it enjoyed prosperity as a local organization. Realizing that progress and expansion go hand in hand, plans were made for a National Convention to be held in June 1924, and at that time, three chapters answered the roll. From that time on, many other organizations have become part of Beta Phi Theta.

Here at Tri-State College, in 1922, a group of men banded together under the name of the ''Four-Eleven Gang'' with the promotion of good fellowship as the primary object. Every effort met with success, and they, too, turned their thoughts to expansion in order that other students might enjoy the privileges of this relationship. From this group was founded the Lambda Phi Epsilon Fraternity, and as the membership grew, the first fraternity house on the campus was opened in 1925. In 1929 came the recognition of fraternities by the college and at that time Lambda Phi Epsilon became the Delta Chapter of the Beta Phi Theta Fraternity.

The chapter has not lost sight of the primary reason for its presence on the campus. Its men are chosen for their scholastic abilities and their qualities of leadership. By this method of selection, the chapter has banded together a group of men whose goal is the same, and whose leadership and brotherhood are outstanding. The chapter is justly proud of the fact that its men have been, and still are prominent in the eyes of the student body; before their eyes in the societies and honorary organizations of the college. It has been the aim to maintain a high scholastic standing, and to develop the man; to have in their midst a rightful share of the leaders on the campus; and this year, more than ever before, has the chapter taken its just part in the activities of the college.

Those of the chapter who are graduating will ever cherish the memory of their brothers, their associations with them, and what their lives here have taught them, while those of us who remain are happy in the thought that we must strive continually to lead in our standing and brotherhood, as our brothers have done before us. To our departing brothers we can only give a handclasp and ''God speed'' in things material, but their spirit and inspiration shall ever be with us, and to whatever the future may bring, we add, sincerely, ''Remember 42.''

Delta Chapter of the Beta Phi Theta Fraternity is happy in the possession of the finest brotherhood on the campus; and may it so remain. Graduates, and those whose duty it is to carry on in their name, let us so live so that our lives shall be in unison and harmony with the crest that graces this page.

Delta Kappa Phi

In Dickens' immortal verses on "Things That Never Die" is reflected the underlying theme of fraternalism. A bond of national and international brotherhood within the fraternal bond of a college. A social fraternity in God and fellowship, which increases relations of friendship and a spirit of co-operation among the various colleges of the United States. Thus striving toward a better world, understanding through a fraternal society, the basic and most fundamental principles of brotherhood.

However, there is very little brotherhood on the face of the earth, but it is believed that college fraternities, now and then, offer as fine an example of brotherly association and devotion as can be found anywhere. A college fraternity has ideals, but is not ideal and never could be, for when the present ideal is reached, if ever, there will be new standards to strive for.

The fact that a college fraternity is not perfection, is no reason it should be condemned. Instead of being an object of idle condemnation, it should stand as a challenge to inspired improvement. The advantage of a fraternity over any promiscuous grouping of individuals is, that it is a nearer approach to an ideal background for fraternal feeling. Since ideal conditions for fraternal association are unattainable, isn't it a splendid step toward human tolerance and understanding?

These statements, perhaps, echo the principles upon which Delta Kappa Phi was founded, and they fulfill the realization of numerous other opportunities; for instance, in the field of service in the name of the brotherhood in the fraternities' contribution for the advancement of its Alma Mater; in the inspiration for better scholarship and better living through friendship; and in its offering of lifelong pleasure to him who will but accept it. Thus Delta Kappa Phi came into prominence and today has several chapters located in the better colleges and universities throughout the United States. It is an organization of which any member should be justly proud.

Kappa of Delta Kappa Phi has naturally been inculcated with these principles and has striven, in the three years of its existence to maintain them, growing out of what was known on the campus as the Tri-Alpha chapter of Beta Phi Sigma. On February 6, 1932, it emerged into a social fraternity of national reputation. However this change was realized only after a year of petitioning and hard work on the part of the members.

In closing the life book of Delta Kappa Phi, may we say that we hope the influences that have been ordained in the past continue to influence its members through the years to come.

Alpha Delta Alpha

"Character, scholastic ambition, the ability to get on with other people, and the definite purpose in mind of accomplishment—these are the qualities to seek."—Dr. Thomas Arkle Clark, Dean of Men, University of Illinois.

The above statement exemplifies the spirit upon which Alpha Delta Alpha was founded and upon which it has thrived since its inception. As the basis of all fraternal life is one deep-rooted in brotherhood, it is to the mutual benefit of both college and fraternity if the latter, through its members, endeavors to seek out and live those qualities to which Dr. Clark refers.

Eta Chapter of Alpha Delta Alpha was originally a local fraternity going by the name of Phi Lambda Tau, which was founded March 31, 1924. The beginning was small but the growth steady. In 1929 a petition was presented to the governing body of Alpha Delta Alpha, a national social fraternity, and early in the following year Phi Lambda Tau officially became Eta chapter of Alpha Delta Alpha.

Our beliefs are few enough to enable us to remember them without difficulty, yet be all embracing. We strive, at all times, to see the beauty in all of the Master's creations and so carry out the original ideas of brotherhood as intended in His greatest of fraternities, that the world may come to realize the inestimable value of brother love which is synonymous with, and is the very heart of, fraternalism.

We believe that to honor and obey the vows one pledges is a sacred duty to one's self respect and to the world at large. It is our earnest prayer that we be granted the ability to think right and also the courage to be loyal to those thoughts.

We believe in the placing of breadth of mind, ability, and character above mere social status and such accidents of birth so remote from our control and over which we could not hope to exercise a non-existent will.

It is ever our policy to lend our services when and where we can, since this, in itself, constitutes one of the greatest privileges of fraternal life. Fraternalism would be naught were we to check so gratifying an impulse. Shakespeare's lines could well be altered to embrace this in saying: "The quality to aid one is not strained. It falleth as the gentle rain, from Heaven above, upon this earth beneath where it is twice blessed. It blesseth him that gives and him that takes." Were we all to retain the wonder of the great truth of these lines in our minds and act accordingly we would, indeed, be true supporters of fraternalism in the highest sense of the word.

We realize that the complete fulfillment of all of these ideals is hardly possible in mere humans; therefore we have the continual striving for their attainment as the ever-burning torch which lights our way toward these, the ultimate and absolute in clean living, joy, and that happiness which emanates from deserved success.

Phi Iota Alpha

The origin of this organization dates back to 1921 when it started its activities as the Club Hispano-Americano, composed totally of Spanish-American students attending Tri-State College. After six years of existence, it was registered under the laws of the State of Indiana as the Alpha Chapter of Gamma Eta Alpha Fraternity.

Not content with our local success, an active and intensive campaign was begun by us; this movement culminated with the fusion to Phi Lambda Alpha Fraternity as the Eta Chapter. This fraternity whose ideals were our own and whose views were similar to ours, having five chapters solidly established throughout the most important universities of the East, represented our goal. Then uniting our efforts with theirs, we carried on our campaign, going from one success to another. On December 26, 1931, during our annual convention held that year in the city of Troy, N. Y., the Phi Lambda Alpha merged with the Sigma Iota, another strong Spanish organization with chapters in the South, to form the present Phi Iota Alpha Fraternity of which we are the Iota Chapter.

At present we are the strongest Spanish organization in the United States, with ten well organized chapters and several new prospects. Our fraternity does not only comprise the United States but it also includes every Latin American country, each one representing a zone, and the various zones in a body go to make up the Latin-American Union.

Our aims are, besides fostering among our members a better sense of duty and study, to create that Latin atmosphere which is an integral part of our far away homes and to prepare our members to carry out in the future that great ideal, ultimate goal: "The political, social and economical union of all Latin-American countries."

Tau Sigma Eta

Honorary Engineering Society

With the idea in mind of rewarding outstanding scholarship, Tau Sigma Eta, the Honorary Engineering Society of Tri-State College, was founded by the Engineering Society of Tri-State College in January, 1930. A charter was granted to the society by the State of Indiana in April, 1930, permitting the Tau Sigma Eta to function as a local Collegiate Honorary Society.

To be eligible for election to Tau Sigma Eta, a student must be registered in some branch of the College of Engineering, and to have maintained a grade average of B or better for the preceding four terms prior to his election. At the beginning of each term a list of eligible candidates is submitted to the society and the seven candidates with the highest scholastic standing are elected to membership.

Formerly membership in the society could be attained by outstanding campus activity, three members being elected for campus activity each term, but due to abuse of this means of securing membership in the society it was eliminated by an amendment to the constitution in the spring of 1934, and at the same time the scholastic requirement for membership was raised.

Under the guidance of the late Professor Ott, Tau Sigma Eta instituted in its program a short speech or talk by one of its members at each meeting. These talks are given voluntarily by the member; the subject is of his own choosing, and they are primarily for the purpose of giving the member practice in speaking before an audience. In the short time since their inception they have greatly benefited the members in their speaking; while at the same time the society has listened to many interesting talks by its members.

Tau Sigma Eta is at present endeavoring to become affiliated with a national honorary society. With five years of active work behind it, Tau Sigma Eta now holds an enviable place among the organizations on the campus. By keeping high its standard of membership it serves to help its members maintain their excellent scholastic standing; while for future members it serves as an encouragement to pursue their studies with greater diligence and perseverance.

Tau Sigma Eta stands for the ideal in campus organization; brotherhood and friendship, a well balanced social program, and the maintenance of high scholastic records.

Chi Epsilon

Honorary Fraternity

Chemistry has always entered into every phase of our material existence, from prehistoric times down to the present day. Chemistry is the foundation of almost every science; and the higher our civilization develops the greater will be the future of chemistry. Chemistry has seen the rise and fall of nations, has witnessed internal strife, and has been the chief factor in the moulding of nations. This age of chemistry is calling for men of patience, integrity, and genius—in short, the type of men who stand for the ideals of Chi Epsilon. The honorary chemical fraternity, Chi Epsilon, is one of the main cogs in the Chemical Engineering course. Its members are men of high scholastic standing and ability, whose chief interest is in the welfare of chemistry.

Its founder, the late Doctor Sherrard, was widely known for his activities and pursuits in the realm of chemistry. His ceaseless efforts to make the fraternity become an important factor for the chemical student have been realized. The society has now become one of the outstanding student organizations of the campus, and promises to perpetuate the ideals of its founder.

CAMPUSOLOGY

On the following pages are presented our campus life photos. We can't decide just who planned the original layout idea, but we're egotistical enough to say that we like it.

M — *Sorority*
O — *Sigma Mu Sigma*
D — *Sigma Delta Rho*
U — *Beta Phi Theta*
L — *Delta Kappa Phi*
U — *Alpha Delta Alpha*
S — *Phi Iota Alpha*

All work and no play makes Bob a dull boy—Oh, yeah!

Your picnic — Where's the lunch?

Goin' my way?

Shopping—?

All dressed up and—

How's the water?

So bashful and coy—

Whose bandana? Nice, eh what?

Twelve miles from Tri-State—solitude.

Memorable night—Friday.

Lee, quick, your car in the hands of pals!

De Rea, the sweetheart of Sigma Mu Sigma.

King Plumb-ing the depth.

At home after—

Oh, Elton!

Berger, such associates — Centerfielder Paul!

Don left sleeping.

As Lee makes class.

After a restful night.

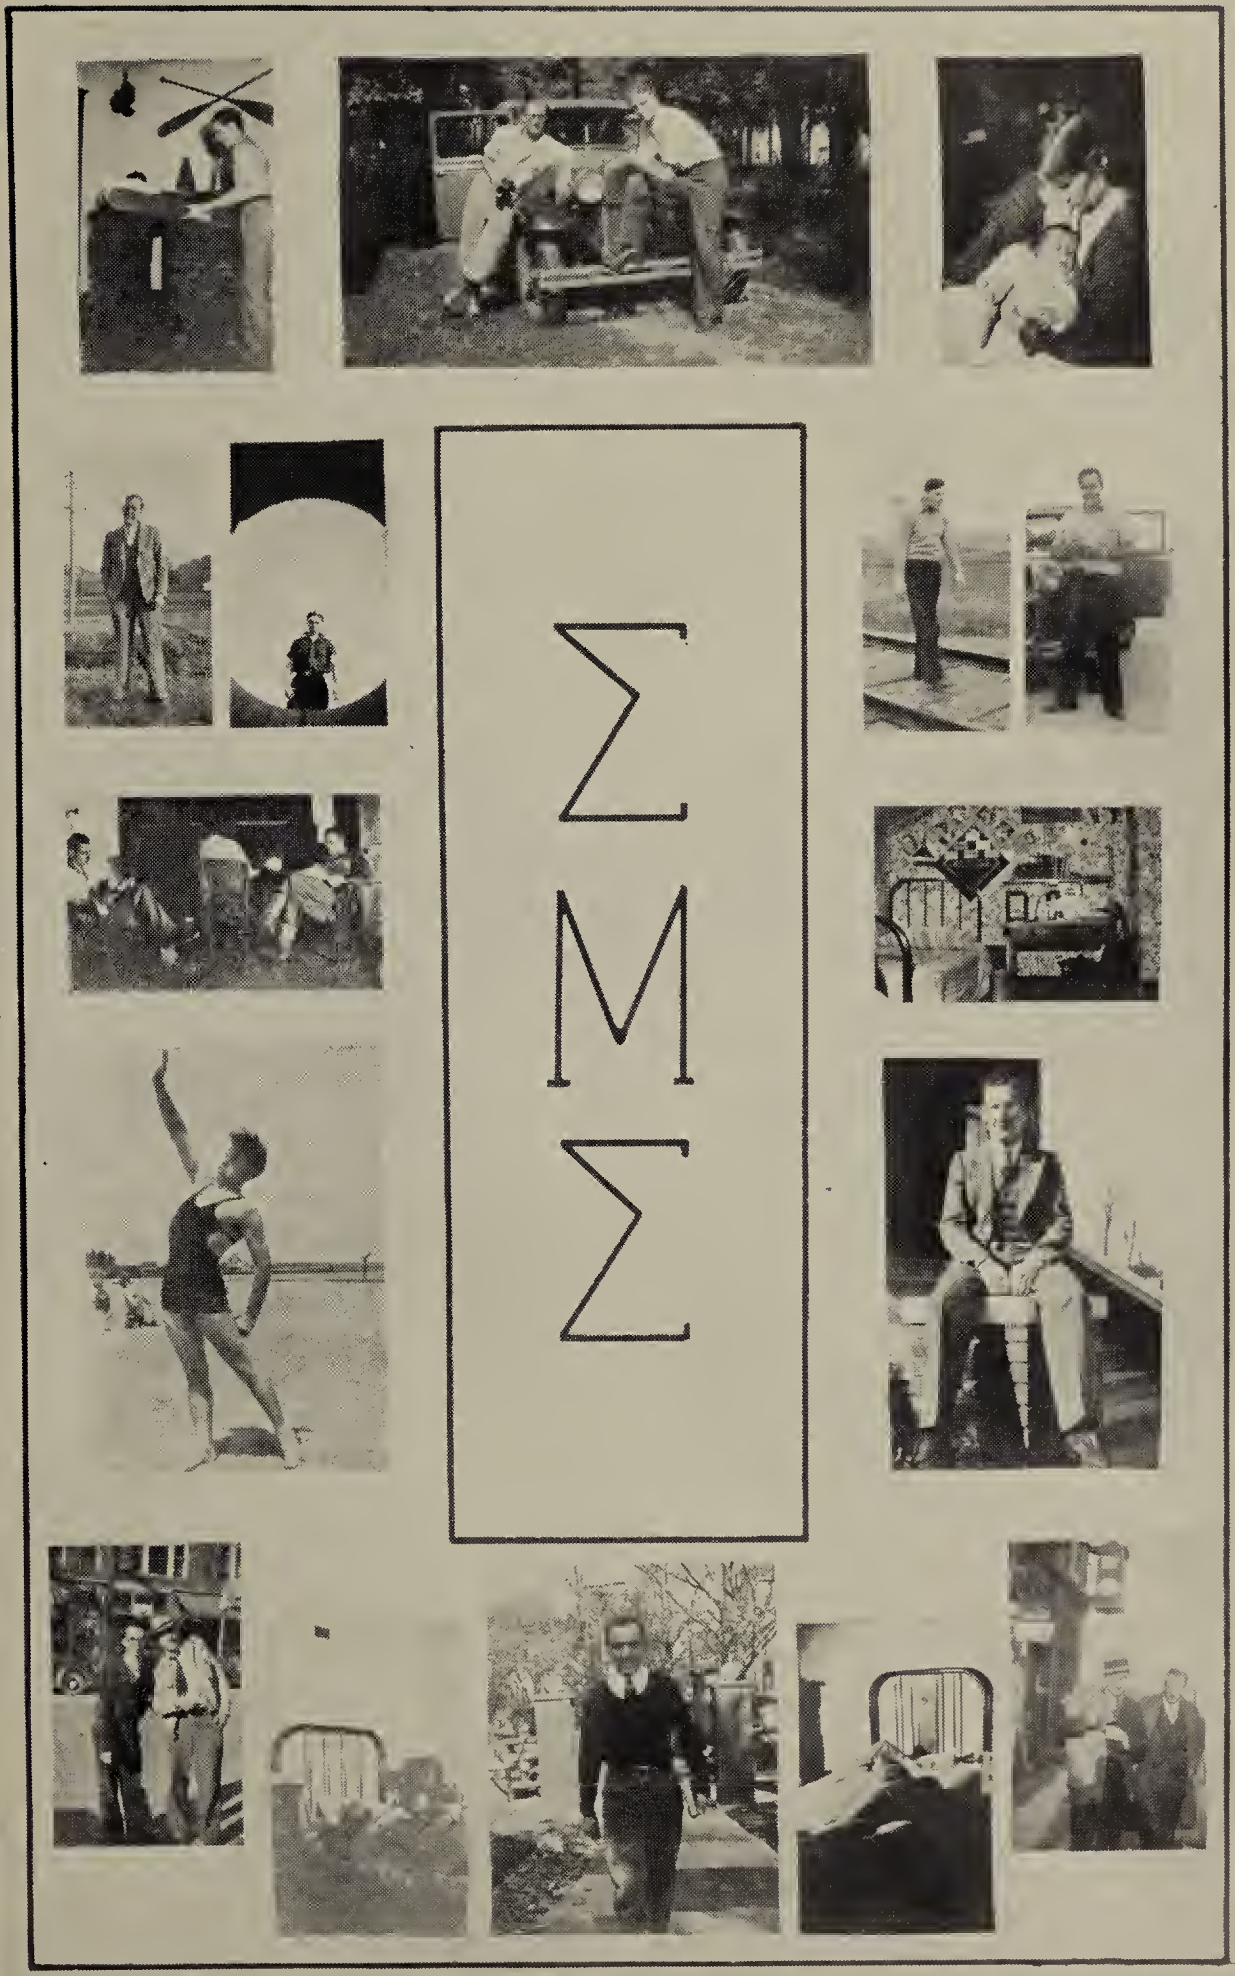
Vollmer and Watson following Greely's advice.

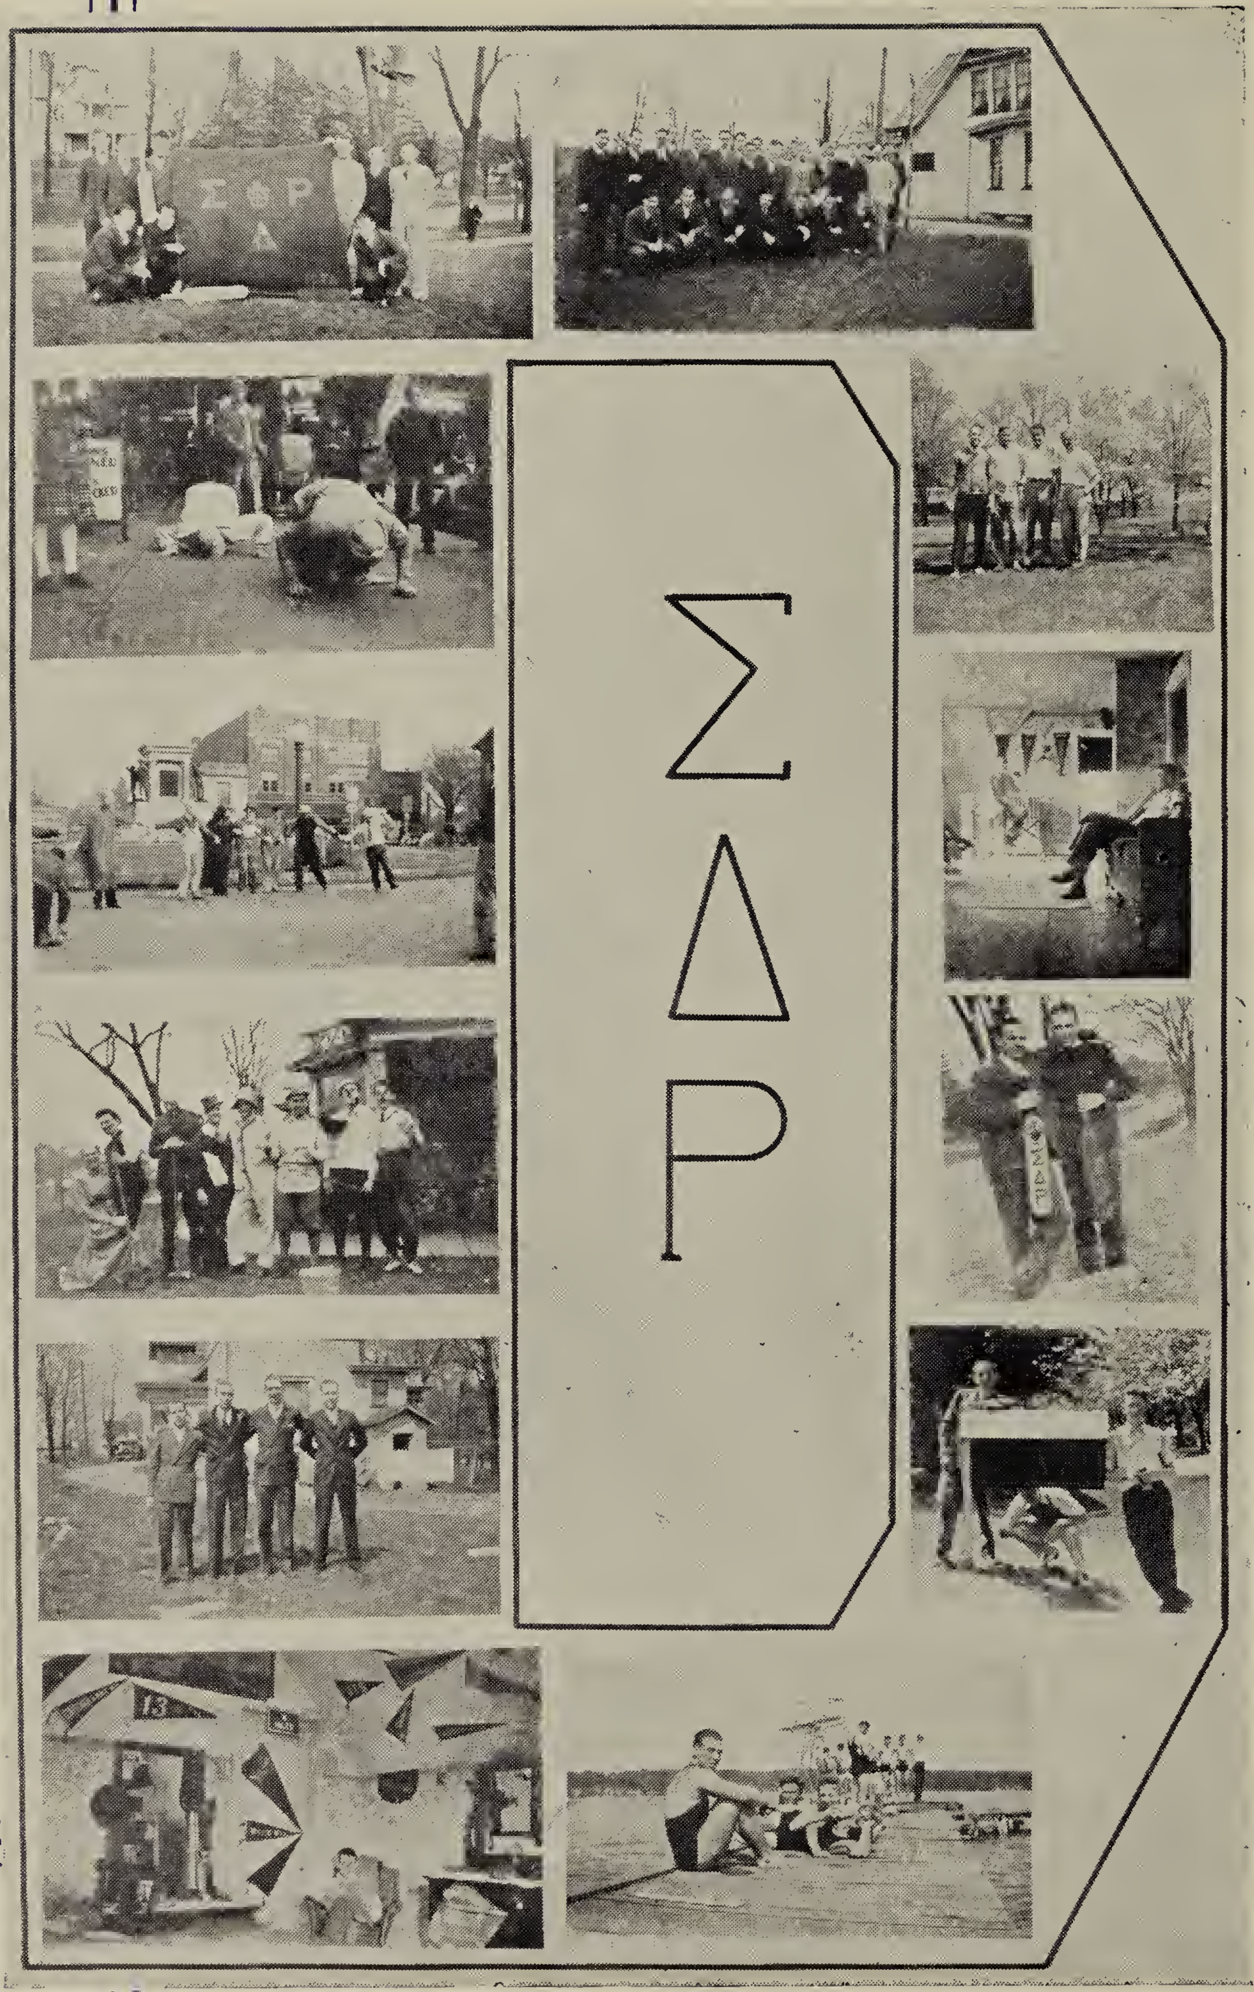
Price-s are up.

The bed takes a rest.

Waiting for Machin's return.

Don may go after him.





Of that bunting, they are proud.

They protect it with such scenes.

Some master minds of pledge torture.

And in the room in which they brood.

At Weldon's we find them.

—Then home scenes.

Β Φ Θ

They have a dance.

Where they should be.

Where they are

Using—

What they should be using.

Not a conscience in a mile.

Busby with Mr. and Mrs.

All dressed up.

A car to use.

Broad smile.

Study group.

Posing.

Δ Κ Φ

Rough and tumble.

Waiting.

Ready.

Beats me.

Now what?

Atlas?

Three musketeers.

My, oh my—can it be possible.

Pals.

The Bluebloods of A. D. A.

A psychiatrist please.

We approve.

Where is the monument?

It snowed last winter.

Wanda moved in town later.

A brother's Cord.

On the porch.

A fender well — What do you think—?

We like to see this.

A little germ caused this.

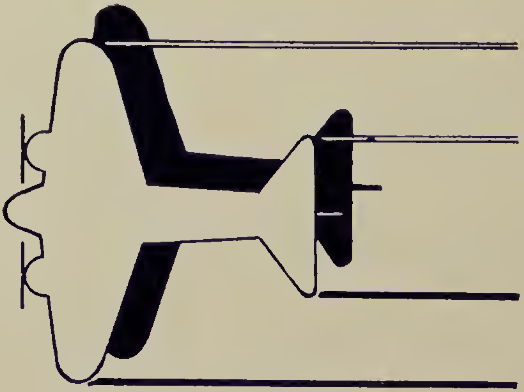
Second row—Raymond Lawrence, Harry Busby, John Wills, John Worman, Norman Taggart, George Alexaitis, Howard McKay, Edward Moyer, John A. Stippick.

Seated—Gordon Freedman, George Michky, Alva Stahl, Prof. Walter Burnham, Robert E. King, George W. Westphal, Harold Davis.

Aeronautical Engineering Society

The Aeronautical Engineering Society of Tri-State College was organized October 6, 1933. It is an outgrowth of the old Engineering Society. The purpose of the society is threefold. First, to create goodfellowship among the students. Second, to acquaint the student with the problems of the aeronautical industry. Third, to bring the student into contact with men of wide experience in the aeronautical field.

After a period of very successful existence the society thought it advisable to become affiliated with some national organization. As a result a chapter of the National Aeronautic Association of the U. S. A. was established.



The charter was presented to the society on April 12, 1934, by Mr. Frank Hackett, N. A. A. Governor for the State of Ohio.

Since its organization the society has had the pleasure of entertaining and hearing many men who are prominent in the aviation industry. Among these were Captain James Haizlip, nationally known racing pilot; Prof. R. Franklin, nationally known glider authority and builder; representatives of aircraft manufacturing corporations and aviation schools; and members of the U. S. Air Corps. It has been the aim of the Aeronautical Engineering Society to engage speakers that would interest not only the students of Aeronautical Engineering but anyone interested in the automotive industry as well. From time to time motion pictures from the well known manufacturing corporations are shown at the regular meetings.

On May 18, 1934, the first field trip was made, visiting Selfridge Field, Michigan; Chrysler Experimental Laboratories at Detroit, Mich.; and Stinson Aircraft Corporation at Wayne, Mich. The field trip of 1935 was made to Langley Field, Va., under the supervision of Professors Burnham and Ely. This trip also included a visit to the Smithsonian Institution in Washington. D. C.

The untimely death of Prof. L. A. Ott dealt a great blow to the society as well as to all students of Tri-State College. From the time of the beginning of the society Prof. Ott was its close friend and advisor. It was through his influence and his intense interest that the society was able to weather the stormy periods and become one of the largest institutions in the college today. To the organization of which he was a part he will always remain as its guiding spirit. May the Aeronautical Engineering Society continue to uphold the traditions set forth by him and thereby continue on the road to success and service.

Electrical Engineering Society

Primarily, the purpose of the Electrical Engineering Society is to benefit and aid the students. This benefit is derived through many channels, prominent among them being the opportunity of meeting men from the industry, who are brought in by the society. Conversation with such men is always valued by the ambitious student. Splendid opportunities for practice in public speaking are afforded throughout the course of the weekly meeting. Similarly, experience in executive duties may be gained by holding an office in the organization. Through the inspection trips sponsored by the society a broader conception of Electrical Engineering may be gained.

These are but a few of the numerous benefits open to members of the society. These, in conjunction with the many others, combine to form a broadening influence which the electrical student cannot afford to overlook.

A short resume of the past year's work will facilitate a fuller appreciation of the society's activities.

On October 16, 1934, a group of electrical students met in the Engineering building for the purpose of becoming organized, and about this group as

a nucleus, the Electrical Engineering Society of Tri-State College was formed.

Immediately upon its formation in the early part of the fall term, the society began work on its largest project, that of building a float to compete in the Stunt Night parade. Under the capable direction of Professor Summers, committees were appointed and given responsible charge of the various sections of the work. With this organization, the float was constructed with fine workmanship, and in the shortest possible time. The labors of the society were not without reward, for the float was chosen by the judges to be the finest in the parade.

Other activities during the Fall term were an inspection trip to the local power station and waterworks, lectures by men prominent in the electrical field, and finally, a completely successful closing banquet.

The Winter term opened on January 8, with the election of officers. At subsequent meetings many interesting lectures and discussions were enjoyed. Social functions were planned for this term, but owing to the diphtheria epidemic it was impossible to carry out the plans.

At the present time, as this writing goes to press, the Spring term organization has already proven itself successful. Unfortunately, we cannot recount its future activities; however, we may mention what it intends to accomplish, and what we feel sure that it will accomplish.

Inspection trips to the major power plants of lower Michigan, and of Chicago are being planned. This tour will extend over several days, and will be of inestimable value to those making it. In addition, arrangements are under way to have men who are in close contact with the industry speak before the society. As usual, there will be educational lectures by members who have had practical experience in their particular field.

Throughout the entire discussion no mention has been made of the men who lectured before the society, and of those who held office. The success of the organization was due largely to the efforts of the officers, whose names are listed herewith. The following lectured: Professor S. D. Summers, Mr. M. Tucker of the N. I. P. S. C., Major Hunter of N. I. P. S. C., Professor W. Pfeifer.

Finally, it is our sincere hope that future Electrical Engineering Societies may be completely successful in any projects that they may undertake.

Mechanical Engineering Society

The Mechanical Engineering Society of Tri-State College, in its efforts for the 1934-35 school year, has attempted to develop an organization of lasting quality, by promoting both academic and social activities on the campus.

The first meeting of the year was called to order by Dean Raymon Roush. At this meeting the officers for the current term were elected and plans were made for the society's participation in the annual Stunt Night parade. The entry in this event was the "Mechanical Zephyr," a sixty-foot model of the famous streamlined Burlington train, which created much favorable comment. The float was constructed and financed by members of the society and professors in the Mechanical Department.

A number of lectures by men prominent in various fields of mechanical engineering were sponsored by the society at appropriate times throughout the year. Always well attended by both members of the society and the student body in general, these lectures proved to be highly educational and

afforded the students many opportunities to become familiar with conditions and problems often encountered in actual practice. In conjunction with several other organizations on the campus, the Mechanical Society leased and presented a group of talking pictures. Besides opening the doors to a wealth of technical information on modern engineering practice, the showing of these pictures was also a source of entertainment and pleasure for all who attended them.

The social highlight of the year was the annual Mechanical Engineering Society banquet. The affair was attended by some forty student engineers and faculty advisors, and was acclaimed the most successful in the history of the organization. The banquet was given in the dining room of the Kollege Inn, where food, music and interesting after dinner talks by the advisors completed an evening of sincere enjoyment.

The Mechanical Engineering Society in the past has operated purely as a local organization. However, during the course of this year, petitions have been presented to nationalize the society by establishing a Student Chapter of the American Society of Mechanical Engineers on the Tri-State Campus. In view of the fact that the present school year was more than half completed at the time of the petitioning, no definite decision has been handed down by the membership committee of the National Chapter at this time. There still remains, however, the probability that the charter for a Student Chapter of the American Society of Mechanical Engineers will be granted early in the 1935-36 school year which action would, without a doubt, perpetuate the Mechanical Engineering Society of Tri-State College.

As the end of this school year approaches, the graduating members of the society wish to present this nucleus of an organization to the coming student Mechanical Engineers so that in the future the Mechanical Engineering Society of Tri-State College shall continue to grow, and uphold the principles upon which it was founded.

The Radio Club

The science of radio engineering embraces nearly every field of science and engineering to some degree. From the field of physics, it borrows the phenomenon of the transmission and behavior of light, the theory of wave motion and acoustics, the principles of elect-statics and electro-magnetics The electrical engineering field contributes the theories of coupled circuits and transmission lines, items from the design of electrical machinery, the behavior and analysis of complex waves, and similar diversified fundamentals and theories. Crystallography and molecular structures and theories are taken from chemistry. These are but a few examples set down with the intention of providing an insight to the complex nature of this newly opened branch of the engineering field.

Any technical organization has as its purpose the furtherance of education of, and the distribution of information to its members. This has been the

goal of the Radio Club. The topics have been so chosen that a maximum of diversity has been obtained.

During the fall and winter terms specially prepared topics were presented by members at the regular weekly meetings. The five hundred thousand-watt transmitter of WLW, five meter transmitters and receivers, broadcast distribution networks, radiating systems, the design of smoothing filters and the operational classification of amplifiers were among the many subjects presented. During these past few weeks, five meter mobile experiments have been carried out with successful results.

The amateur station, W9PMZ, connected with the laboratory, is operated by licensed operators attending the college. To date, two-way communication has been held with numerous countries throughout the world, including England, Belgium and Germany. The station is equipped for both radio-telephone and radio-telegraph communication.

To further the interests of the organization, an attempt is being made to obtain two speakers for the present term, one to speak on receiver design and the other on sound reproducing units. An inspection trip to view the transmitter of WLW is also contemplated.

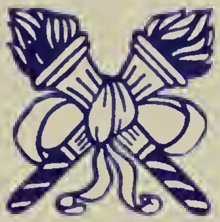
ORGANIZATIONS



First row—Dorothy Clark, Mildred Aukerman, Harriett Ewers, Irene Andrew, Almeda Wells, Pauline Platt, Arlene McLain, Ruth McLain, Elsie Lybarger.

Second row—Professor Robertson, Honorary Member, Professor Crisman, Honorary Member, Irwin Obernuefemann, Carl Casato, James T. Cunningham, D. Dickinson Buck, Orville Rumfeldt, Bruce Gernon, Charles Hinaman, Robert Ames, Professor Hoke, Honorary Member.

Third row—Melvin Green, Frank G. Hartman, Sterling Hutchinson, Robert Athearn, Glenn Severance, Edward L. Theobald, Hobart Bertrand, Willis Shoup, Frank Hildebrand, Elmer Garaux, Chiam Kwi.

Fourth row—Rodrigo Aragon, George Plate, Arthur Lang, John Huskins, Elmore Pate, Richard Borland, C. W. Watson, Lawrence Wohlwend, Charles Giles, Louis Everson.

Sigma Epsilon Society

Beginning its second year with the Fall term, 1934, Sigma Epsilon Society elected Joseph Kolb, president; Charles Daniel, vice-president; Pauline Platt, secretary; and Roland Durst, treasurer. Meetings during the term were dinner-meetings on every other Tuesday. This plan has been continued, with occasional special business meetings.

The purpose of Sigma Epsilon Society is the extra-curricular study of commerce, industry, and social activity. Speakers during the Fall term were: Roy Reppard, field representative of Tri-State College; Judge Clyde Carlin, Steuben and LaGrange county judge; Professor Handy, of Tri-State College; and Dr. John Humfreys, pastor of the Angola Congregational Church.

A constitutional committee, James Cunningham, chairman, prepared a constitution for the society to replace the one in use. The new constitution provided for two vice-presidents, who would advance to the presidency, a second vice-president, secretary, and treasurer being elected each term. This system maintains a constant executive control, each first vice-president learning his duties and preparing the program for his term before becoming president at the beginning of each new term. Officers' terms are one school term. The new constitution was adopted; James Cunningham was elected second vice-president.

At the first meeting of the Winter term, Mr. Daniels resigned the presidency and Mr. Cunningham succeeded to that office. Elections were held for all other offices and the following were elected: First vice-president, Mr. Irwin Obernuefemann; second vice-president, Mr. Sterling Hutchinson; secretary, Miss Pauline Platt, and treasurer, Mr. Fredrick L. Hisgen.

During this term the membership of the society was increased to thirty-eight members including a number of girls from the Secretarial Department. The officers co-operated splendidly in an effort to strengthen the character and name of the society.

The speakers at the dinner meeting all presented most interesting talks in their field. They were: Mr. Tucker, district manager of the Northern Indiana Public Service Company; Mr. Millhone, sales promotion manager of the Auburn motor car; Mrs. Jeffrey, buyer for women's wear department of Wolf and Dessauer Department Store, Fort Wayne; Mr. Cooke, agency supervisor of The Lincoln National Life Insurance Company, Fort Wayne.

Particular mention must be made of the meeting at which Mr. Millhone was the speaker. After a short talk on sales promotion work, Mr. Millhone introduced Mr. Ab Jenkins, of Salt Lake City, Utah, holder of more AAA-confirmed speed marks than any other driver. Mr. Millhone showed a sound film of a record drive which Ab Jenkins made with a Pierce-Arrow on the salt bed course west of Salt Lake City during 1934. The distance covered over the course in twenty-four hours was 3,053 miles, at an average speed of 127.2 miles per hour, establishing seventy-five new records. The film was made and shown with new equipment, giving the audience a splendid knowledge of how interesting and well done sales promotional films may be. Mr. Jenkins answered questions freely.

As this is prepared for press, one meeting of the new term has been held. Mr. Wyandt, of Angola, was the speaker. A special meeting for election of officers was held. The officers for this term are: Irwin Obernuefemann, president; Sterling Hutchinson, first vice-president; Elmer Garaux, second vice-president; Harriet Ewers, secretary, and Hobart Bertrand, treasurer.

The new officers are planning on many interesting programs for the regular meetings. It is expected that the strength of the society will be greatly increased during this term.

Tri-State Accountants Association

The Tri-State Accountants Association is an organization of the advanced students of the School of Commerce of Tri-State College, who have an appreciative interest in the usefulness of accounting as a practical and applied science. The activities of the association are rather technical in their major premises. It was not designed primarily as a social organization, yet its charter members were not unconscious of the proper potentialities of social relationships in virtuous business affairs, and accordingly they did not neglect sufficient provisions in the constitution to furnish authority for whatsoever social functions may be deemed adequate and fitting to the constructive purposes of the organization.

The association is not conceived to lend itself in any measure, to political effects, nor to aiding the present temporary, personal ambitions of any associate. It is intended rather to manifest a pooling of the common efforts of all the members for the benefit of the union. This purpose has been demonstrated by a number of happy objective examples of devotion and service both on the part of officers and other members. The whole membership has seemed to understand that the organization is not a scheme to set up one student as an official hero and all the others as loyal worshippers, but they have again and again demonstrated the splendid accomplishments that can be had through conscious purposeful teamwork.

The Accounting Laboratory

This association wishes to thank sincerely all those persons and organizations outside its membership who have contributed so generously to its purposes, among whom none has aided us more than Mr. Joe Brokaw.

The Newman Club

Motto: "Cor ad Cor Loquitur"
(Heart Speaketh to Heart)

The Newman Club is a Catholic organization of Catholic students approved by the bishop of a place at a non-Catholic university, college or normal school in the United States or Canada.

This kind of organization had its beginning in England during the 19th century under supervision of the celebrated English scholar and churchman, John Henry Cardinal Newman at the Universities of Oxford and Cambridge. The first implantation of Newman Club fructified, till 164 of them have sprung up and grown in the United States and Canada. All of these are united in Catholic Action as the Federation of College Catholic Clubs, and together as the federation constitute one of the units in the Department of Education of the National Catholic Welfare Conference.

The activities of the Newman Clubs have received the approval of the Supreme Pontiffs, Pius X, Benedict XV and the present reigning Pope, Pius XI and the members of the American Hierarchy. This year the Newman Clubs of the United Staes will celebrate their fortieth anniversary.

The Newman Club has for its purpose teaching the Catholic student "How to Live" which involves the intellectual, spiritual and social sides of the individual. This process is what is called Catholic culture. Catholic culture is a tilling, a cultivating of the whole self, a disciplining, a refining of body, soul, mind, heart. It is the bringing out to fullest development of every human quality and attribute of the person and personality that we possess in miniature, capable almost of infinite development, in the mould of which each person is made like to God. Catholic culture is the sanctification and socialization of the individual.

The Newman Club has as its proposition to make its members educated Catholic Gentlemen. It holds up the shield of Newman with its three hearts and the motto, "Cor ad Cor Loquitur," "Heart Speaketh to Heart," taken from the Coat of Arms of Cardinal Newman.

Fellowship is promoted which is one of the basic ideas set forth in all school and college clubs and fraternities.

It is customary to instruct the members at their meetings by means of lectures given on subjects pertaining to the spiritual, moral, intellectual and social sides of life.

The Newman Club of Tri-Sate meets regularly bi-monthly in the club room at the Catholic Novitiate. The members receive communion once a month, after which a breakfast is held. This club is affiliated with the Federation of College Catholic Clubs of which there are now about three hundred in the United States, Canada and the insular possessions of the United States.

The club will send delegates to the Provincial Convention of the Ohio Valley Province which will be held on April 27-28 of this year. It will also send delegates to the National Convention at Toronto, Canada, this summer. The club has completed its ninth year at Tri-State.

Prof. A. G. Harshman
Director

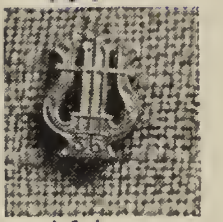
Glee Club

During this past year the Tri-State Glee Club has been widely praised for its excellent work. The club has just completed its fifth year as a separate organization on the Tri-State campus. In this small space of time the high schools within a fifty-mile radius have become thoroughly familiar with the work of the club. Among some of the most recent high schools visited were Montpelier, Bryan, West Unity, Pioneer and LaGrange.

In the recent activities of the club the annual concert of March 12 should receive first consideration. The program was splendidly given to a fine audience. Next we must mention the broadcast over WOWO at Fort Wayne on March 10. A return engagement is to be given in the near future. The club is also proud of two fine quartets and several talented soloists.

The club during the past term has had the largest membership in its existence. It is expected that the club will continue to increase in membership and popularity in the coming year.

The annual concert given by the Tri-State Glee Club on Tuesday evening, March 12, at 8:00 o'clock at the college auditorium under the direction of Professor A. G. Harshman, is as follows:



PROGRAM

PART 1

I. a. Oh, Hail Us, Ye Free! .... Verdi
b. On the Road to Mandalay .... Speaks
Baritone Obligato by Irwin Obernuefemann
Glee Club

II. The Lost Chord .... Sullivan
Cornet Solo by Philip Ryerson
Lorana Kerfoot, Accompanist

III. I Love a Lassie ....
Male Quartet

IV. Russian Melody ....
Accordion Solo by Walter Sireika

V. Three For Jack .... Squires
Baritone Solo by Samuel Jacobs
Mrs. Lloyd Wilson, Accompanist

VI. Adoration .... Borowski
Violin Solo by Lorana Kerfoot
Miss Wilma Dick, Accompanist

VII. Duna .... McGill
Baritone Solo by Herman Dygert

VIII. a. Swing Along .... Cook
b. Winter Song .... Bullard
Glee Club

IX a. Madrigal, from the Mikado .... Sullivan
b. Fairy Dance .... Zimmerman
String Quartet

X. a. The Swan .... Saint-Saens
b. Beauteous Morn (Contest Number) .... German
Angola Ladies' Chorus
Mrs. Blanche Finicle Sopher, Conductor
Mrs. Blanche Gary, Accompanist

XI. Rondo .... Mozart-Kreisler
Violin Solo by Herschel Keel
Miss Wilma Dick, Accompanist

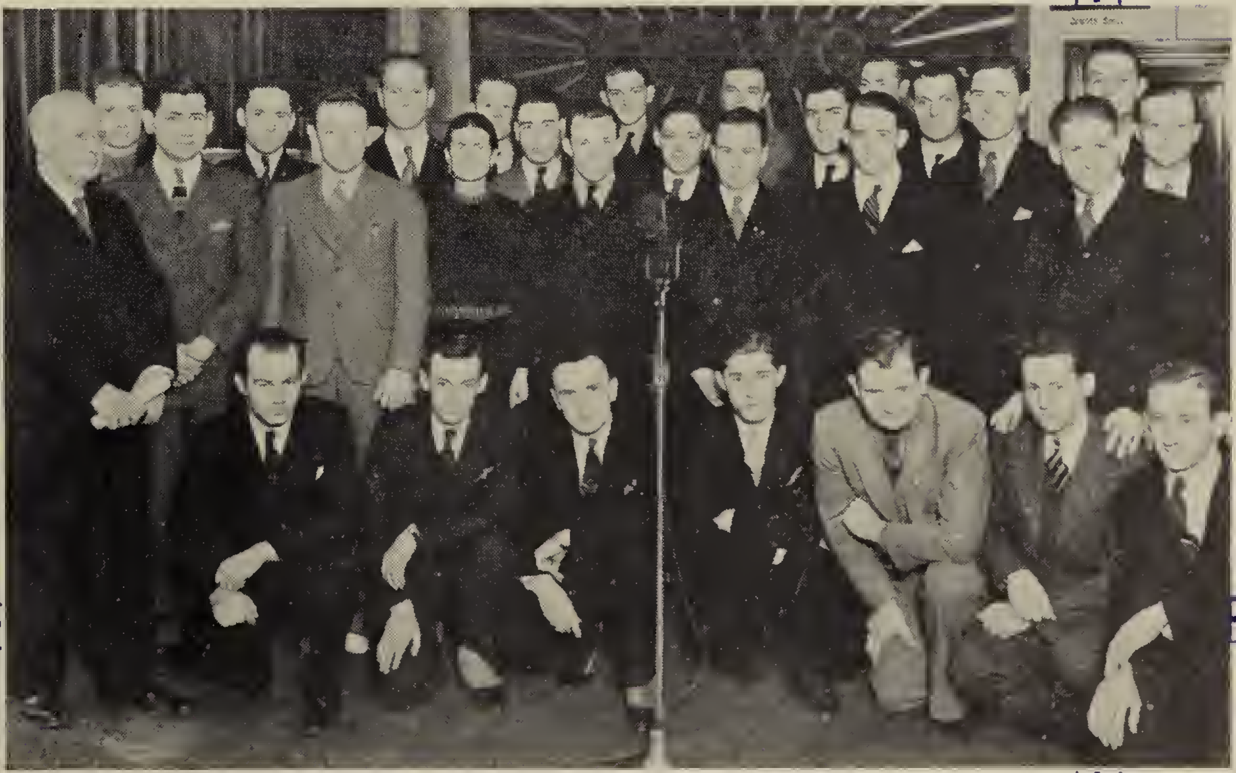
XII. One Fleeting Hour .... Lee
Baritone Solo by Robert Kerfoot
Violin Obligato by Lorana Kerfoot
Miss Wilma Dick, Accompanist

XIII. Cornfield Melodies .... Cook
Male Quartet

XIV. a. Drink to Me Only With Thine Eyes .... Old English
b. Morning (Contest Number) .... Speaks
Glee Club

The club recently won second prize for men's chorus work at Elkhart. This is an accomplishment of which the club can indeed be proud.

The present officers of the club are Ralph Price, President; Nevin Hochstetler, Vice-President; Keith Shock, Secretary; Albert Olmstead, Librarian; and Lorana Kerfoot, Pianist.

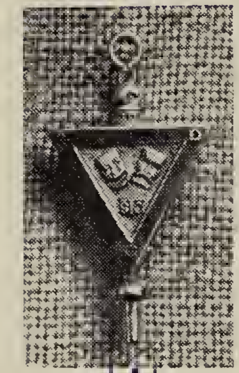


Bottom row (left to right)—R. Moore, N. Hockstetler, K. Schock, N. Henderson, H. Keel, H. Dygert, R. Price.

Middle row—Professor A. G. Harshman, S. Jacobs, L. Emerson, L. Kerfoot, Accompanist, H. George, A. Omstead, J. Foley, C. Giles, F. Green, M. Hovarter.

Back row—J. Lawrence, M. Hyatt, D. Fisher, H. Bertrand, M. Bosick, M. Grim, F. Juriga, R. Kellick, R. Hipsley, I. Obernuefemann, J. Haley, R. Kerfoot.

Dramatic Club



The Dramatic Club of Tri-State College is directly sponsored by the Board of Directors of the College. The membership of the club is open to all students who qualify. The governing of the club is done exclusively by a committee chosen from the members of the club.

The College Dramatic Club has ceased to be merely a functioning campus organization. Its products are eagerly awaited by the immediate community and surrounding towns. The recent spring tour of request engagements has been most encouraging to the club leaders. Plans have been completed for a set of scenery that can be easily moved. It is firmly constructed and the color design will provide the proper atmospheric background for the actors. This scenery has been designed so that it will be effective on any stage no matter of its size or method of lighting.

Many graduate members of the Dramatic Club have found this training received while in Tri-State College serves them well. The Dramatic Club has among its former members a loyal and interesting group.

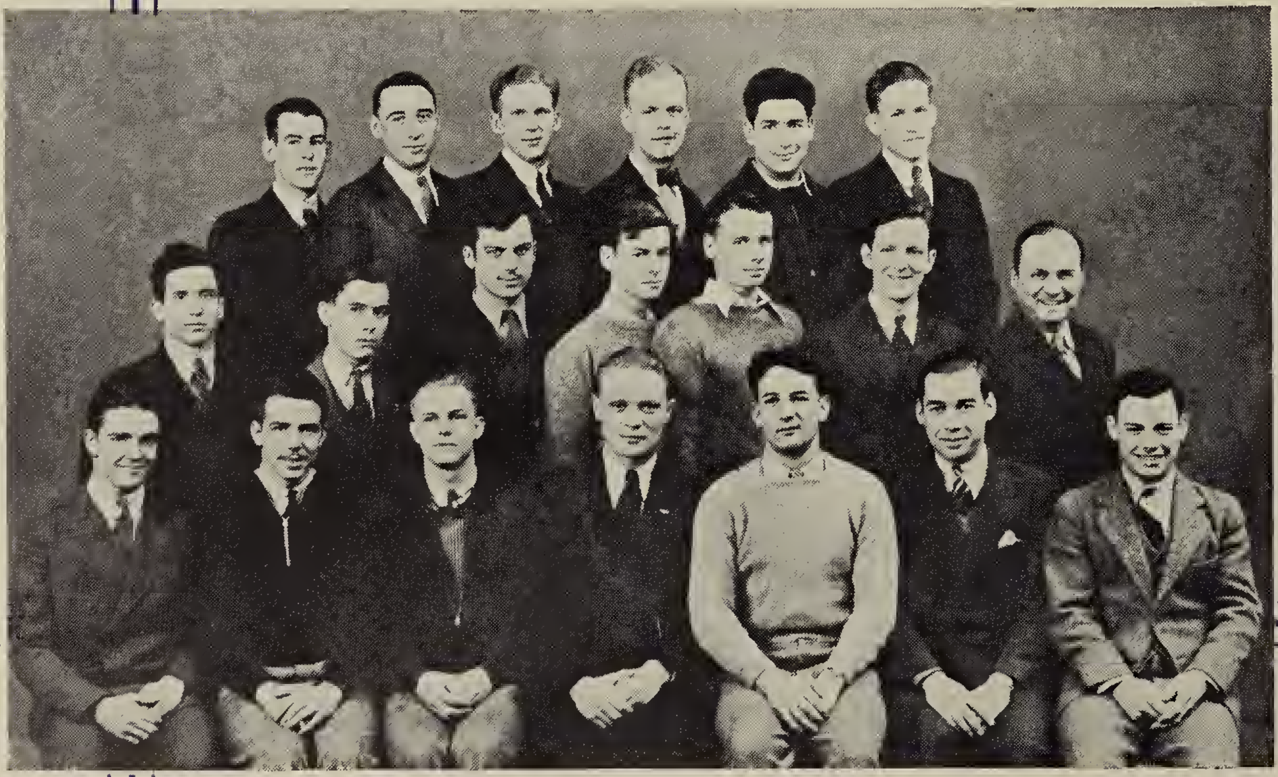
The Cornell Dramatic Club, Yale Peppetters, University of Michigan Play Shop, Duzer Du (DePauw University), and the Dramatic Departments of Ball State and Indiana University include Tri-State Dramatic Club members on their class rolls.

The triangular blue and gold pin which is earned through attendance of meetings, participation in plays, working on scenery, light and costumes is a

Back row (left to right)—Dudley Crawford, Clyde McKinley, George Brackett, Joe Dunn, Martin Kirkhill, Walter Patchin.

Middle row—Charles Whiteman, Cecil H. Dodd, Burns Clark, Frank Markeli, Gilbert Allesbrook, Paul Fox, Charles E. Shank (director).

Front row—Theodore Stearns, Graydon Stemples, Warren Knapp, James Crabtree, Frank Hildebrand, Francis Oksala, Richard Kandt.



Prof. C. E. Shank

reward of merit for one year. The letters on the pin, TDS, stand not only for Tri-State Dramatic Club, but also for the actual demonstration through dramatics as a medium for better living of Truth, Democracy, and Courage—a high ideal, but one worth working and living for.

Play production at Tri-State has proved an interesting and beneficial extra-curricula activity. A program of one-act plays, i. e., "The Valiant"; Eugene O'Neill's "In the Zone"; George M. Cohan's "Justice"; and Tarkington's "Station YYYY" were presented during the Fall term as a benefit. The proceeds were applied to the light fund. At Christmas chapel Charles Dickens' "A Christmas Carol" was effectively produced. Club members presented the casket scene from "The Merchant of Venice" as a prelude to an address on "Shakespeare and Religion" at the Christian Church during the Winter term. Make-up and lectures on the subject were projects worked out in the regular meetings.

"Alexander's Horse" and "Easter Morning in Cheshire Street" were produced at Easter chapel before an appreciative audience. The club's annual spring play, which is placed in commencement week, will be "Hay Fever" by Noel Coward.

National Collegiate Players Magazine publishes the activities of the club and carries pictures of its major productions. During the summer the revival of a classic play will be presented for the dedication of the new Hillsides open air theater on the campus. The success of last year's venture, Shakespeare's "As You Like It," and the interest expressed by students and community in a permanent outdoor theater have caused the Board of Directors to plan and build one on the campus.

Mr. Charles E. Shank is the director of the Dramatic Club and its activities.

Hail, Chinese Student Club!
At Progress' front we'll ride;
By all our heart and soul
Always we'll strive with pride.

'Tis honor, and friendship,
And happiness we price.
Don't give up though 'tis hard—
He surely wins who tries. —C. K. Chiam.

Chinese Student Club

With keen desires to gain occidental sciences while here, we do not neglect the opportunity to acquaint ourselves with each other, and establish a better relation with the students and people of this country. We, the Chinese students, are fervidly national yet sanely international. For this reason, we are in sympathy with the many nations which, at present, endeavor resolutely to secure international goodwill, conciliation and peace. So the numerous functions of the club are incalculably valuable; thus, its existence should be very much complimented.

To comprehend a true and intelligible picture of our club, a brief retrospect from the time of its inception is presented. Through the worthy efforts of Messrs. W. H. Lee and C. S. Wong, and the co-operation of other Chinese students, on May 5, 1933, the Chinese Student Club saw the first formal meeting. Also through their efforts, the club was admitted as the local unit of the widely known Chinese Students Christian Association of North America. To be sure, they deserve a good deal of esteem in the forming of this organization.

Indeed, considering its many problems and obstacles, it was a colossal task to score a distinctive improvement which we noticed to our satisfaction. With no intention to belittle the merit due to the founders, we have to admit that the present successful accomplishment owes much to the previous and present administration as well as to the members who has displayed and exerted in no small degree their zeal and co-operation.

The scope of activities extends broadly; in educational sphere, from argumentations to lectures; in recreational entertainment, from various games of cards to ping-pong, to say nothing of minor events—if you please, many of these are regularly on the schedule. Banquets, dinners, and tea-parties have been rather often throughout the academic year, and whenever available, good and celebrated speakers are invited. Literally we stand with pride, natural but pardonable, to realize that we have performed our duty well, in bringing our club remarkably to a third year milestone of success. However, we still look hopefully for a more refulgent future.

Within the shelter of our club, we are no longer individuals adrift aimlessly, but fine citizens in the making; and from it, we find and learn discipline, friends, recreation and interest (both social and educational). Equipped with this experience, we are the more fitted to join the battle of life, and have more chances to be victors. We shall always carry in mind, the compendious, noble motto of our club, viz., "To promote goodwill, equality, fraternity, liberty and cordiality in our universe."

May our most cherished club, through the course of time, be crowned with renown that every alumnus, though in a remote land, may acquiescently and lustily say, "Bravo."

FEATURES

From the Four Corners

To represent and maintain the influence of the foreign human element, which, not too sparingly, permeates the student body of Tri-State College, is the purpose of these photographs taken and received from those students who are strangers to our nation.

It has always been the fortunate circumstances of Tri-State College to enroll students from other lands, whose worth and remembrance are ever close to its ideals of accomplishment in learning. To plant a seed into the soil which is alien to its birth; to nourish it with the teachings of a remote nation; to watch it grow from seed to plant, to a crop of greater learning, is an accomplishment within the reach of any nation. And this, in truth, has been the lot of those foreign students who have placed the control of their education in the hands of our college. It is a privilege to serve all people of all lands. Our doors are open to "whosoever will may come."

Thanksgiving Dance

At the beginning of the past school year, the Delta Chapter of the Beta Phi Theta Fraternity set its goal in the form of increased social activity on the campus. The chapter varied from the usual trend and sponsored the outstanding social event of the year at Tri-State College.

On the evening of November 24th, 1934, Beta Phi Theta had the pleasure of being host to a merry crowd of sixty members, guests, and their lady friends at a Thanksgiving dance held at Potawatomi Inn.

On a campus of this size, it is seldom that a fraternity takes it upon itself to sponsor an occasion of such magnitude. There are many conditions which tend to hamper such an affair but due to the excellent work of the entertainment committee, which at that time was composed of two members of the fraternity, J. R. Steidel and E. Murr, the dance began as a venture and ended as a wonderful success. It was through their unstinted effort and sacrifice of time that the event became possible.

The dance was gay, colorful—the music excellent—and over all pervaded the air of young people thoroughly enjoying themselves.

The faculty was represented in the guest patrons for the evening, who were Professor and Mrs. Burton Handy and the late Professor and Mrs. Luther Ott.

Splendid music for the occasion was furnished by Dick Crowell and his Recording Orchestra, who have become extremely popular with the student body at Tri-State College.

The Inter-Fraternity Dance

R. A. Grimaldo William Moses
G. H. Chytry E. H. Sisk E. M. Barnes

The first inter-fraternity ball, sponsored by members of the various National Fraternities on the campus, was held on Saturday evening, April 13, in the Masonic Temple. The ball was limited to members, pledges, and alumni of the various fraternities with the Board of Directors and faculty of the college in attendance.

The devotees of the terpsichorean art danced to the scintillating strains of Dick Crowell and his Recording Orchestra.

The Masonic Temple, ever emblematic of the spirit of fellowship and brotherhood, proved a most suitable background for the staging of this, Tri-State's first inter-fraternity ball, and was fittingly bedecked with the banners of those fraternities who were responsible for this eminently successful contribution to Angola's social life.

Among the honorary guests and patrons were: Prof. Burton Handy, President of Tri-State College, and Mrs. Handy, Prof. and Mrs. George G. Niehous, Prof. and Mrs. W. R. Robertson, Prof. and Mrs. Raymon Roush, Prof. and Mrs. John Roush, Prof. and Mrs. S. D. Summers, Prof. and Mrs. Cushman Hoke, Prof. and Mrs. Gerald Moore, Prof. and Mrs. W. E. Burnham, Prof. and Mrs. John Humphries, Prof. and Mrs. Verne Jones, and Professors Parrott, Ely, Overton, Hauber, and Lower.

Property of Library
TRI-STATE COLLEGE
Acc. No. 160.

A gay crowd of some 200 dancers joined hands to defeat the storied bugaboo of the "13th," and were overwhelmingly successful in putting it entirely to rout.

To the members of the inter-fraternity dance committee goes the credit for having contributed worthily to Tri-State's social activities and it is the sincere hope of all that the Board of Directors and Fraternities may see fit to make this an annual affair.

We feel that were we to go to press without some due recognition to those who contributed their time so unselfishly in order that this become a reality would indeed be a gross oversight; therefore, "Ladies and Gentlemen, we give you the Inter-fraternity Dance Committee: G. H. Chytry, Sigma Delta Rho; William Moses, Delta Kappa Phi; E. H. Sisk, Beta Phi Theta; R. A. Grimaldo, Phi Iota Alpha; and Edson M. Barnes of Alpha Delta Alpha as chairman. May they ever be as successful in future undertakings."

"A Pause—and the Result"

Tri-State Celebrates Golden Anniversary

In August, 1934, Tri-State College celebrated her fiftieth anniversary. Distinguished men and women from many States assembled to pay tribute to the institution and its founders. The programs and enthusiasm exceeded the anticipation of visitors, also citizens of the community, who joined in large numbers in celebrating the rare event. Over three hundred distant alumni and students came for the occasion. Welling up in many hearts were sacred memories of the men and women who labored on the hill in the early days.

The celebration, under the management of a capable committee, opened with a banquet at Potawatomi Inn, August 9, attended by four hundred persons. Alumni were present from nearly every State in the Union, the majority representatives of the early school. Mrs. Lois Kimsey Marshall, wife of the late Vice-President of the United States, Thomas R. Marshall, graciously presided as toastmistress at the banquet. Following greetings from Mayor Shearer was the welcome address by President G. G. Niehous. Other speakers were Judge C. C. Carlin, Dr. Frances Elliott Clark, President of the Golden Anniversary; Irene Sniff Porterfield, Rachel Fairfield Gussler, Judge D. R. Best, Dr. Fred Clark, Judge A. C. Wood, Prof. I. M. Cochran, Ezra L. Dodge (first graduate of Tri-State).

At the Christian Church, next morning, a large audience paid tribute in a memorial program to men of Tri-State's early days. Dr. Frances Clark presided.

An organ recital by Anna Sniff Mitchell, and other appropriate music, introduced the memorial program. Prof. Alice Parrott's address was replete with history of the institution and the ideals of its founders. She paid high tribute to the late President, Littleton M. Sniff, his able wife, and her sister,

Scene from "As You Like It"

Miss Lucy Vandervort. Reminiscences of alumni were other interesting features. Speakers were Judge Howard Townsend, Miss Bertha Clawson, Will G. Brooks, George V. Stephenson, W. P. Schnautz, Dr. Don F. Cameron and Dr. Charles Reign Scoville. Concluding the above program was a luncheon served in the church dining rooms, followed by post-prandial speeches.

In the afternoon Tri-State College held open house. Visitors viewed the new buildings and many improvements on the campus. They expressed wonder and admiration of the beauty of the entire setting. A short program in the open was featured: Prof. Burton Handy outlined the present policies of the school with its departments of Engineering and Commerce. Rev. Dr. John Humfreys and Rev. Basil Holt addressed the assembly.

Another delightful function was a banquet for former students of the normal school. Over two hundred men and women paid tribute to Prof. Willis A. Fox, Dean of the School of Education for many years.

Saturday reunions of various departments attracted former students in sectional meetings: Ferris B. Martin, founder of the Engineering Society, addressed the engineers, Dean William A. Pfeifer presiding; former Dean of School of Commerce, Walfred Lindstrom, addressed the commerce group, B. C. Warford presiding; Kenneth Hubbard presided over a session of the Blackstone Club, where the former Dean of the law department, Judge D. R. Best, and Walter D. Stump, Capt. O. R. Kuhlman, and Judge Leonard spoke.

An outstanding meeting Saturday was the conjoint meeting of Philomathean and Crescent literary societies, Dr. Clark presiding. The years were rolled back and old-time enthusiasm, good humor and good literature prevailed. Former society members met in debate. There were music and other treats. It was a high-light of the celebration.

The Angola Chamber of Commerce tendered automobiles for delightful drives about the lakes. Sunday, all the churches dedicated their services to former students.

Especially worthy of mention was the musicale under Prof. A. G. Harshman, with a fine array of talent; also Shakespeare's delightful comedy, "As You Like It," both presented in the open-air theater, southeast corner of the campus. It proved an admirable natural setting for the "Forest of Arden," and the production was a masterpiece under the direction of Prof. Charles Edwin Shank, head of Dramatics at Tri-State. Vari-colored lighting effects, beautiful period costumes, with talented artists, afforded a presentation of surpassing merit.

A permanent organization of alumni and students was effected at the close of the sessions; Prof. J. W. Wyandt, Chairman; Dr. Frances Elliott Clark, Honorary Chairman; Prof. G. G. Niehous, First Vice-President; Winifred R. Waugh, Secretary; Prof. S. D. Summers, Treasurer.

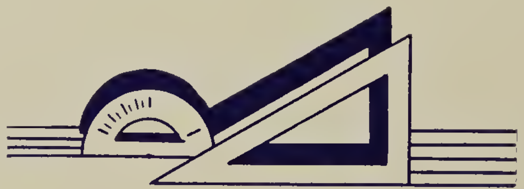
Inter-Fraternity Athletics

Tri-State College, unlike other educational institutions, does not rely upon a program of athletics to make its name known to the outside world. Rather than to supply the sporting public with promising material for athletic combat, the Board of Directors believe it better to furnish the scientific world with engineers of a higher calibre. This however, does not mean that athletics are entirely unknown here.

The Panhellenic Council has presented a program of sports with which it hopes to serve a dual purpose. First, fraternity men are permitted the privileges of participating in their favorite athletic pastimes, and second, a clean form of diversion is furnished for all who witness the various contests. At present, baseball is the major sport. However, preparations are being made for tennis, golf, track, swimming, bowling and basketball. Schedules will be prepared in the near future, and it is the sincere hope of the council that these games will be accepted with the same enthusiasm that greeted the start of baseball.

The baseball schedule is composed of fifteen evenly matched games. Each fraternity on the campus is represented by a team which will play five games with an eye on the beautifully engraved bronze loving cup, which is to be presented to the fraternity whose team completes its series with the highest average. The well balanced schedule being played and the fact that keen rivalry is always predominant among fraternities engaged in athletic contests have assisted materially in creating an intense inerest both among students and the citizens of Angola. Each contest is marked with more than a small share of sparkling baseball and the hustling teams with the winning spirit always prevailing, have succeeded in attracting many enthusiasts of the great national pastime.

The cup winners for the 1935 season cannot at this time be announced. It can be stated however, that a display of diamond tactics, nothing short of sensational, will be required of the successful aggregation, and the interest shown in this first year of a well rounded program of inter-fraternity athletics more than repays the Panhellenic Council for its efforts to promote clean, healthy diversion for students of Tri-State College.



Crack of the Bat!

PHI IOTA ALPHA VS. BETA PHI THETA

The opening games of the season saw Beta Phi Theta playing against Phi Iota Alpha in a rather sluggish game of baseball. The batteries for Beta Phi Theta were Moloney and Dehaven, and for Phi Iota Alpha Baldo and Kruz. Moloney struck out nine, walked five and gave up three hits and seven runs. Baldo struck out eight, walked nine, gave up eight hits and twenty runs. Stolen bases were credited to Kirklosky, Busby, Dainton, Fountain, King and Moloney.

The game was not very fast although there were a few good plays. The fact that the teams were slow in acting was due to the fact that with little practice both teams were engaging in their first game of the season.

In the seven innings of the game there were about twelve errors divided between two teams. Dainton received the high batting average of the day, batting .750. The Beta squad has only two members of last year's team, the remainder being new material.

ALPHA DELTA ALPHA VS. SIGMA MU SIGMA

In their opening game of the season Sigma Mu Sigma defeated Alpha Delta Alpha to the score of 12 to 8. The batteries for Sigma Mu Sigma were Guidi and Love; for Alpha Delta Alpha Porter and Harasta. The Sigma Mu Sigma squad was ably captained by their catcher, Bert Love. Although there was nothing spectacular about the game it was, nevertheless, an interesting game to watch with a fair exchange of runs until the latter part of the game at which time Sigma Mu Sigma forged ahead and maintained their lead throughout the remainder of the game. Clean hitting, fast thinking, and fine sportsmanship made it an interesting game from the viewpoint of the spectator.

PROGRESS

1885

Fifty years ago women wore hoop skirts, bustles, petticoats, corsets, cotton stockings, high button shoes, ruffled cotton drawers, flannel nightgowns, puffs in their hair, did their own cooking, baking, cleaning, washing, ironing and raised big families, went to church on Sunday, and were too busy to be sick.

Men wore whiskers, square hats, Ascot ties, red flannel underwear, big watches and chains, chopped wood for stoves, bathed once a week, drank 10c whiskey and 5c beer, rode bicycles, buggies or sleighs, and went in for politics, worked 12 hours a day and lived to a ripe old age.

Stores burned coal oil lamps, carried everything from a needle to a plow, trusted everybody, never took an inventory, placed orders for goods one year in advance and ALWAYS MADE MONEY.

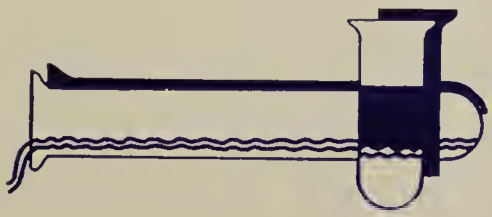
1935

Today women wear silk stockings, short skirts, low shoes, no corsets, and an ounce of underwear, have bobbed hair, smoke, paint, powder, drink cocktails, play bridge, drive cars, have pet dogs, and go in for politics.

Men have high blood pressure, wear no hats and some have no hair, shave their whiskers, shoot golf, bathe twice a day, drink poison, play the stock market, and ride in aeroplanes, never go to bed the same day they get up, and are MISUNDERSTOOD AT HOME, work five hours a day, play ten, and die young.

Stores have electric lights, cash registers, elevators, but never have what the customer wants, trust nobody, take inventory daily, never buy in advance, have OVERHEAD, MARKUP, MARKDOWN, QUOTA, BUDGET, ADVERTISING, STOCK CONTROL, ANNUAL, SEMI-ANNUAL, END OF MONTH, DOLLAR DAY, FOUNDERS DAY, RUMMAGE, ECONOMY DAY SALES, and never make any money.

If you like these conditions and think life worth living, I wish you the COMPLIMENTS OF THE SEASON.



A TOAST

By Robert C. Peterson, E. E. '28

Here is a toast I'd like to drink,
To a fellow I'll never know,
To the "rookie" who's going to take my place
When it's time for me to go.

I wonder what kind of a fellow he'll be,
And I hope he stifles the moan
And see him grin when he hikes up town
Mailing the first one home.

I wish I could give him the bracing word
I longed at times to hear.
I wish I could give him a chummy hug
When never a pal seems near.

I earned my "E" by hard old work,
And I'd like to pass it on
To the one who burns the mid-nite oil
Some nite when I am gone.

Will he see every "here" on my record marked?
Will he note my times at bat?
Will he ever note how I argued thru
Some problem of a day that's passed?

And I dare to hope he may pause some day
When he's called to the front of the "deck"
And say: "I must grin, for he always grinned
When he got it in the neck."

But I've only the job itself to leave,
With a "pleasure" for him to don,
And never a cheery word to speak
To my "buddy" who carries on.

Then here's to you, old top! I drink
To you and the hard-earned "E".
May you get the breaks and rate the job
And be what I longed to be!

We'll meet some day, on the unknown sea,
Out in the realms of space,
And I'll know your grip as I "bag your fist"
And gaze in your smiling face.

And while we smoke, you'll spin your yarn
Of how you carried on.
So I'm drinking to the health of the one
Who'll take my place when I am gone.

A Mental Toothache.

If you believe in lucky seven,
Then we do give you
Threefold luck,
With Tri-State campus girls.
For on this page are twenty-one girls
—and one "lucky" dog.
Oh, for a dog's life.
They have made the best of time, and time returns the compliment.

They know so little, and know it so fluently.

There's a lot to get up in the air with.

Isn't he grand—so chic?

Taxi—or what have you?

"Birds of a feather flock together."

Poses or what have you.

Thanks for the "Barrymore" Con.

Just sweethearts—so it's said—.

Commercials — My, My! papa spank.

We agree—.

Careful Prof.—.

When do we eat—?

Joe "de thoid" so we are told.

Blank Electricals

"Cush—how many—?

Yes, George. "Happy daze are here again."

Hey! Stan—Where's Oliver?

"Ain't love grand."

A two-gun man of the sea—will it shoot?

Police—or sumpin'.

Hi—Cupid.

Girls look—such brawn.

Paddlin' his own "rowboat."

Hold it Jack—it might fall.

Trusting Bob—Oh yeah.

Three of a kind—?

Eats—come get it.

The horse isn't a student of Tri-State.

What is it—? A blonde.

A Lady??? We think—:

"East meets West."

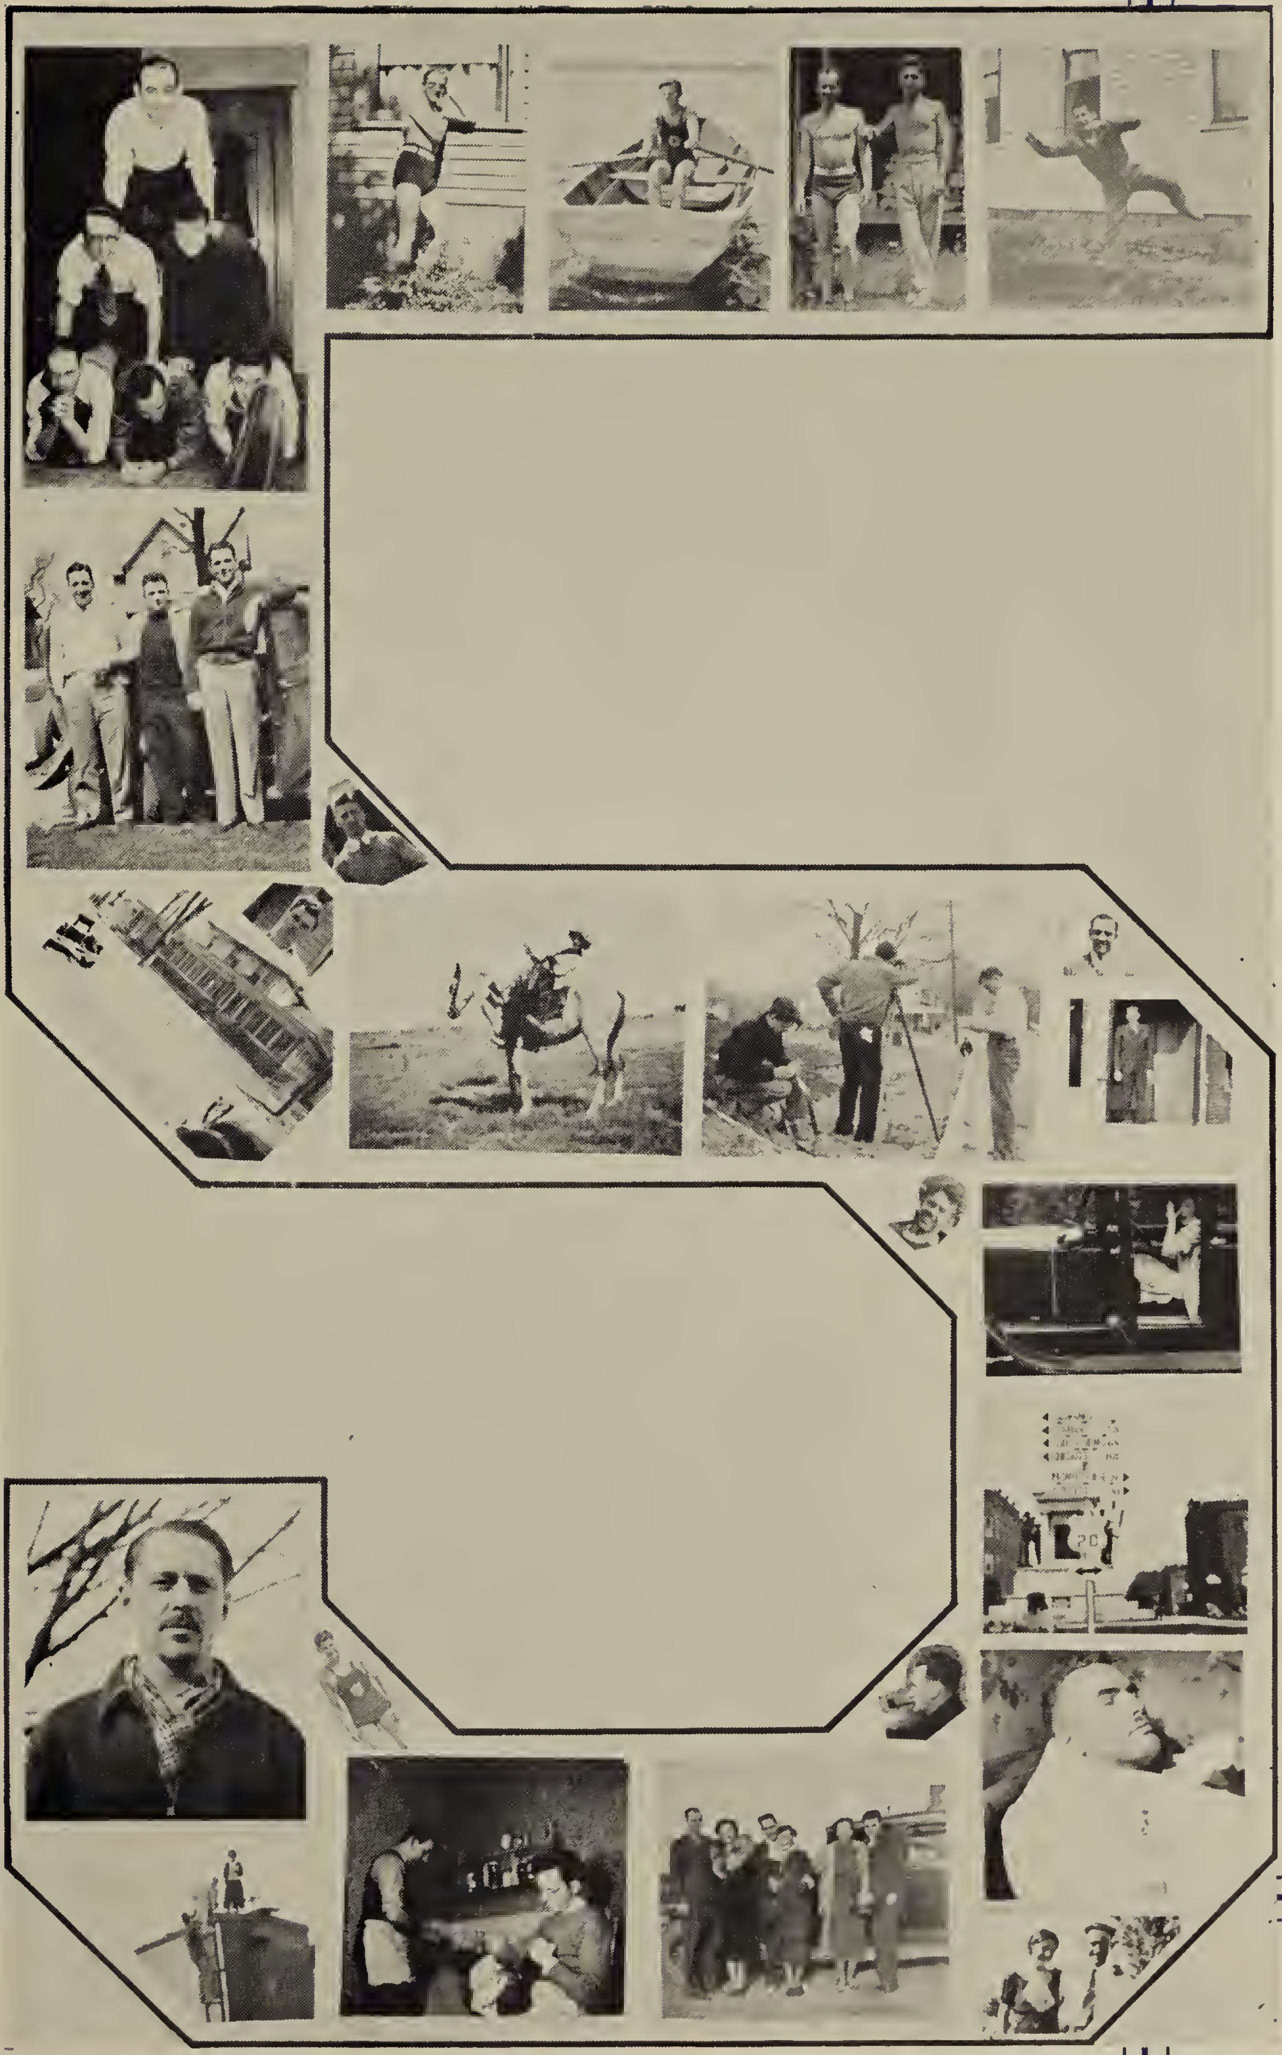
"A natural."

Three makes a crowd, why don't you move on boys?

Girls—What say?

Posing—perhaps.

Tarzan the cave man??? Oooh girls.



The History of Christmas

» Modern Version »

Geoffry Dunn

As we all know, at least the majority of us, Christmas is celebrated for a very special cause and purpose unknown to the average student and teacher. We have heard many tales about this honorable holiday, but probably the truth of it has been pretty well hushed up because of various reasons. It is to enlighten your minds on this delicate subject that I am here today. Unaccustomed as I am to public speaking, I feel it my duty to God and my country to disclose this narrative that has varied greatly through the ages, and tell you the real "Christmas Carol."

It was the night before Christmas, or, that is, it would have been the night before Christmas if there had been any Christmas; but back in 1492 they knew nothing of Christmas because Santa Claus was not born yet. As I was saying, it was the night of the 24th, 1492, and Julius Caesar and Thomas Jefferson were discussing the stock market when the report came over their radio that the Armistice had been signed and George Washington had crossed the Delaware without getting his feet wet. They immediately decided to have a party to celebrate the occasion. They sent Christopher Columbus to pass out the invitations. As Henry VIII was going with Pocahontas, she had to have an invitation. Chris went to look for her over in China where she lived. He turned left at the second traffic light instead of going straight ahead, and bumped into a small island later known as North America. He sailed around the coast of Nebraska and saw a town in the distance. He got out his Austin and started out, leaving his ships on top of one of the rocks in Rocky Mountains. When he came near the town, Andrew Jackson met him; and they decided to start a bank. Chris had two nickels he had managed to sneak out of his pay envelope when his wife wasn't looking. He didn't like to carry large sums of money, so they started a bank and called it the Dime Savings Bank. (Do you get it?) When the news of this reached King Henry in Switzerland, he started the Civil War and hired Grant and Lee to have a fight and the one that won would receive a gift. Of course we all know that Lee represented the northern people, better known as Yankees, and Grant represented the southern people. Of course, Lee won and King Henry dressed up in red suit with fur on it to keep him warm and gave Lee a peppermint candy cane. This was the first Christmas, but it came on Thanksgiving Day; so the Kaiser said he would start a war in December so Christmas would be in December. He sent Paul Revere around the neighborhood to tell the people to get ready for Christmas.

That, my dear readers, is the real "Christmas Carol" hot off the Associated Press, copyrighted in 1521, passed by congress under the disguise of the 18th Amendment, and put into effect by President Roosevelt as the NRA.

ADVERTISING

• • •

Because of previous financial difficulties the MODULUS this year found it necessary to increase the advertising rates from 33% to 50% and to eliminate the previous smallest space. The consideration which the advertisers of this book have shown in view of this is greatly appreciated by the staff. It is a known fact that any publication is, in a large measure, dependent upon the amount of advertising it is able to obtain for its success. We take this opportunity for thanking the advertisers for their part in the making of the 1935 MODULUS.

THE ADVERTISING MANAGER.

ANGOLA

We wonder what kind of a telephone bill Sigma Mu Sigma has—what with these long-distance calls to Detroit?

And while we're wondering—sort of comes to mind to consider the amount of gas one Commerce student burns between here and Bryan.

Some campus laddie was trying to tell us that the entrance requirements for Tri-State College was fifty dollars.

Some of these engineers excavating under the Commerce Building forgot one of the laws of physics (the one about gravity, I mean) and nearly lost our oldest building in that hole.

We know of one bright fellow who took a picture of the High School and sent it home as the College Administration building.

We are in favor of: More morning papers in the Inn; abandoning seven o'clock classes; less road workers, who wait till ten o'clock at night to start; new and easier seats in the Engineering and Administration building classes; other things.

Insurance claimants tell how auto accidents happen:
I misjudged a lady crossing the street.
I collided with a stationary street car coming in the opposite direction.
I heard a horn blow and was struck in the back—a lady was evidently trying to pass me.
A pedestrian hit me and went underneath my car.
If the other driver had stopped a few yards behind himself, the accident would not have happened.—Saturday Night.

Freshman: Uh?
Sophomore: What's that?
Junior: Will you repeat?
Senior: Sir, I did not quite comprehend the interrogation.

No wonder there is a lot of knowledge in college—the freshmen always bring a little in and the seniors never take any away.—President Lowell of Harvard.

To his dog, every man is Napoleon; hence the popularity of dogs.

Every man has a right to be conceited until he is successful.—Lord Beaconsfield.
